July	C1-C163	E1-E105	G1-G164	H1-H182	R1-R116	F1-F129
August		E107-E208	G165-G324	H183-H375	R117-R297	F131-F275
September	C165-C287	E209-E312	G325-G441	H377-H534	R299-R452	F277-F415
October		E313-E429	G443-G600	H535-H712	R453-R615	F417-F534
November	C289-C469	E431-E527	G601-G721	H713-H897	R617-R748	F535-F644
December		E529-E634	G723-G842	H899-H1100	R749-R948	F645-F824

# Subject Index to Volume 245

## A

- A23187: *see* Ionophore
- Abdominothoracic measurements, parameter estimation, linear functional relations, R135
- Absorbagogues, absorptive capacity, ileum, G562
- Absorption: *see* specific subject and site
- Acclimatization; Acclimation: *see* specific subject and site
- Acetazolamide  
gradient dependence, hydrogen ion secretion, F622  
transport, urinary bladder (turtle), F210
- Acetoacetate, glucose flux and ketosis effects, children and adults, E373
- Acetylcholine  
adenosine action, oxygenated and hypoxic atria, H468  
adenosine monophosphate, cyclic level and, sweat gland, C189  
atrioventricular conduction, vagus nerve and, H584  
contractions and, coronary artery, H937  
corelease with substance P, esophageal muscularis mucosa (opossum), G19  
eccrine sweat gland, structure and function, R203  
nervous control, somatostatin secretion, pancreatic, E542
- Acid  
chronic ingestion, distal nephron adaptation, F349  
disposal, prostaglandin effects, gastric and duodenal, G751  
excretion  
ammoniogenesis and, renal (dogfish), R581  
ammonium handling and, proximal tubule, F680  
metabolic alkalosis in chronic hyperparathyroidism, model, F450  
organic, intracellular pH and (sheep), C178  
profiles, thiocyanate increase in gastric mucosa resistance (frog), G143  
secretion  
chloride ion requirement, gastric gland, G573  
forskolin-stimulated, gastric glands, C371  
hyperbaric conditions, stomach (dogfish), G236  
pepsinogen secretion interaction, gastric glands, G775  
pH dependence, gastric glands, G730  
serotonin release and, neural control, duodenum, G824  
titratable, distal nephron, F349
- Acid-base balance  
acid excretion and, renal (dogfish), R581  
ammonia excretion and, kidney (goldfish), R590  
ionic balance and, hypercapnia (salamander), R689  
metabolic alkalosis, F425  
respiratory acidosis, medullary collecting duct, F670  
urinary acidification, after hypocapnia, F433
- Acidification  
absence of chloride-hydroxide or chloride-bicarbonate exchange, proximal tubules, F462  
carbonic anhydrase-dependent, proximal tubule, F443  
hydrogen ions, proximal tubule, F647  
intracellular pH and (sheep), C178  
renal, metabolic alkalosis in chronic hyperparathyroidism, model, F450  
solute transport, proximal tubule, F382  
urinary  
insulin stimulation of, bladder (turtle), R69  
suppression of, after chronic hypocapnia, F433  
volume expansion, proximal tubules, F263
- Acidity, luminal, stress ulcers and, R230
- Acidosis  
calcium and proton fluxes and, bone, F204  
carbon dioxide-induced, fatigue and phosphocreatine depletion, C15  
hypercapnic, plasma catecholamines and, awake state, H924  
metabolic  
circulatory and developmental changes, hypoxemia (lamb), H674  
handling of ammonium, proximal tubule, F680  
hydrogen ion secretion, distal nephron, F349  
ion transport and, ileal, G230  
parathyroidectomy and, sodium-hydrogen exchange, brush-border vesicles, F217  
respiratory  
cellular response to, medullary collecting duct, F670  
disequilibrium pH method of investigation, F535  
hypercapnia (salamander), R689
- Acinar cells: *see* Pancreatic acinar cells
- Actin, filaments, vasopressin-stimulated water flow and, urinary bladder (toad), C28
- $\alpha$ -Actinin, cathepsin-D-catalyzed degradation and, H294
- Action potentials: *see* Potentials
- Activity fronts, feeding,  $\beta$ -adrenergic agonist effects, G647
- Actomyosin  
distribution, thyroid state and swimming effects, H713  
soleus fiber ATPase, tension and, C405
- Actomyosin adenosine triphosphatase, mechanical and electrical performance, myocardium, aging effects, H72
- Acupuncture, afferent fiber innervation and, R606
- Acylcarnitines, long-chain, cardiac sarcoplasmic reticulum function and, H969
- Adenine nucleotides  
metabolism, ribose effects on cardiac metabolism, H880  
phosphate transport and, proximal tubules, F263
- Adenosine  
action, oxygenated and hypoxic atria, H468  
concentration, cardiac, pericardial superfusion measurement, H1085  
interaction, inotropic interventions, atria (guinea pig), H475  
interstitial, measurement, left ventricle, H327  
lipolysis and respiration control, brown adipose tissue (hamster), E555  
pathogenesis of hypertension, renal nerve, F1  
quantitation, fluorometry, H887
- Adenosine deaminase  
action, oxygenated and hypoxic atria, H468  
lipolysis and respiration control, brown adipose tissue (hamster), E555
- Adenosine diphosphate  
acidosis, muscular fatigue and, C15  
bioenergetics of sodium ion transport, skin (frog), F691  
carbon dioxide pressure variations, skin (frog), F792  
platelet aggregation, particle collision theory, model, R776
- Adenosine monophosphate, cyclic  
acid and pepsinogen interaction, gastric glands, G775  
acid and pepsinogen secretion, gastric glands, C371  
analogues, protein phosphorylation, submandibular mucin secretion regulation, G44  
calcium ion flux, catecholamine stimulation of, myometrium, C84  
changes, mammary gland and milk (guinea pig), F549  
cholecystokinin, bombesin, and carbachol effects and, pancreatic acini (guinea pig), G676  
8-CPT, pH dependence, collecting tubules, F188  
diabetic heart, H1039  
diethyl, somatostatin inhibitory action, gastric glands and parietal cells, G221  
elasmobranch rectal gland (dogfish), R894  
exercise effects, glycogen metabolism, E166  
glycogenolytic rates and, liver, exercise, R353  
inorganic orthophosphate phosphorylation, renal membrane, F701  
level, isoproterenol-induced, cholinergic potentiation of, sweat gland (monkey), C189  
myosin phosphorylation and, smooth muscle contraction (swine), C255  
natural glucagon and, pancreatic acini (guinea pig), G703  
pancreatic and phospholipid metabolism, anterior pituitary cells, E587  
pH dependence, gastric glands, G730  
protein phosphorylation, submandibular mucin secretion regulation, G44  
ribose effects, cardiac metabolism, H880  
secretin binding, pancreatic acini (guinea pig), G186  
sodium and chloride transport and, ileal, G780  
somatostatin control, exocrine pancreatic function (guinea pig), G208

- Adenosine monophosphate (*continued*)  
 vasopressin-dependent, single nephron, F58
- Adenosine triphosphatase  
 distribution, thyroid state and swimming effects, H713  
 soleus fiber, tension and, C405
- Adenosine triphosphate  
 acidosis, muscular fatigue and, C15  
 bioenergetics of sodium ion transport, skin (frog), F691  
 carbon dioxide pressure variations, skin (frog), F792  
 cardiac cycle and, H354  
 cardiac lysosomes, protein degradation and, C101  
 cell injury and, heart cells, C316  
 chronic copper deficiency, H855  
 coronary vascular resistance, ischemic heart, hyaluronidase effects, H183  
 energy metabolism and, preimplantation blastocysts, C40  
 erythrocyte, thiol-dependent passive potassium-chloride transport, C445  
 membrane potential, adipocyte, hormonal modulation of, E266  
 myocytes, diabetes and, C46  
 phosphate uptake, kidney cell line, F22  
 protection, lysosomes, C68  
 renal, recovery of, F530  
 supply, energy transport, hyperpermeable cardiac cells, C423
- Adenosine triphosphate-adenosine diphosphate exchange, sodium ions, sodium pump and, G327
- Adenosine triphosphate-magnesium chloride  
 cellular mechanisms, shock and ischemia, R117  
 postischemic infusion, renal adenosine triphosphate recovery, F530
- Adenylate cyclase  
 activity, endotoxin shock, liver, R737  
 hormone-dependent, kidney, chronic deoxycorticosterone acetate and, F100  
 kidney, upregulation of, estrogen effects (hen), E273  
 prostaglandin E<sub>2</sub> and vasopressin effects, single nephron, F58
- Adenyl cyclase  
 pepsinogen release and, chief cell monolayers, G641
- pH dependence, gastric glands, G730
- Adipocytes  
 albumin-bound substances, hepatic uptake, G13  
 insulin resistance, chronic uremia, E178  
 membrane potential, hormonal modulation of, E266  
 metabolism, exercise and, obesity, R706  
 ribosomes, protein synthesis, and lipoprotein lipase, insulin regulation of, E121
- Adipose tissue  
 brown: see Brown fat  
 fatty acid synthesis in, physical training effects, E8  
 lipoprotein lipase activity, hormone-treated and pregnant rats, E132  
 long-term food deprivation, refeeding and, E74  
 photoperiodic regulation (meadow vole), R334
- Adrenalectomy  
 glucose release and glucocorticoids, kidney, F223  
 potassium depletion, kidney adaptation to, F329  
 sodium and potassium ion excretion, mineralocorticoid effects, F89
- Adrenal gland  
 fetal, maternal blood volume and, pregnancy, R720  
 plasma adrenocorticotropin and corticosterone, housing and cannulation effects, E515  
 responses, adrenocorticotrophic hormone, R53
- Adrenal glomerulosa cells, calcium efflux from, angiotensin-mediated, E281
- Adrenaline: see Epinephrine
- Adrenal medulla  
 catecholamines, salt-sensitive genetic hypertension and, H762  
 responses, sympathetic nervous system and, ischemic injury, E67
- Adrenal zona glomerulosa, protein, potassium-induced, aldosterone biosynthesis relations, E449
- $\beta$ -Adrenergic agonists  
 effects, activity fronts in feeding, G647  
 prostaglandins, erythroid colony formation and, C322
- Adrenergic blockade: see Blockade
- Adrenergic control, arteries, ear, H320
- Adrenergic mechanism, somatostatin secretion, pancreatic, E542
- Adrenergic nerves  
 ending, norepinephrine effects, pulmonary artery, H104  
 portal valve, renal (rooster), H628
- $\beta$ -Adrenergic properties, catecholamine-dependent, myometrium primary cultures, C84
- Adrenergic receptors: see Receptors
- $\alpha$ -Adrenergic stimulation, glucose production, hepatic, E616
- Adrenocorticoid hormone, sodium-potassium-ATPase activity and, developing proximal tubular cells, F232
- Adrenocorticotropin  
 adrenal responses to, R53  
 central angiotensin II receptor blockade, sodium-deprived, awake state, R881  
 plasma, housing and chronic cannulation effects, E515  
 release, antral gland cell column, G463  
 triphasic pattern of secretion, after adrenalectomy, E60  
 vasopressin and blood pressure and, during hypoxia, E489
- Adrenoreceptors: see Receptors
- Afferent fibers, innervation, acupuncture and, R606
- Afferent nerves  
 activity, noxious radiant heat effects, anesthesia, R576  
 cardiac spina, widespread neural excitation from, R241  
 renal, pathogenesis of hypertension and, F1
- Afferents  
 chemical stimulation, sympathetic reflexes, spinal, heart, R345  
 pancreatic, stimulation of, cardiovascular reflexes, R820  
 spinal, stimulation of, cardiovascular reflexes, R820
- visceral, upper thoracic sympathetic neuron responses, R311
- Aging  
 endurance exercise, myocardial adaptations, H560  
 febrile response and, R379  
 heart rate response, post-cough, R18  
 mechanical and electrical performance, myocardium, H72  
 sarcolemma, calcium depletion and repletion, neonate, H343
- Airway, upper, smoke stimulation, sympathetic outflow during, R433
- Alamethicin, cardiac sarcolemma, diabetes, C241
- Alanine  
 gluconeogenesis, epinephrine and, E294  
 glycogen and phosphorylase and, liver, E521  
 L-labeled, colon, fetal, G424  
 spawning migration, liver (salmon), R827  
 uptake, amino acid inhibition, hepatocytes, G399
- L-Alanine, metabolism and transport, kidney tubules (chicken), F142
- Albumin  
 endothelial permeability, lung, H229  
<sup>125</sup>I-labeled, transport, aortic, pressure effects, H977  
 receptor: see Receptors  
 serum, cerebrospinal fluid, hindlimb, H911  
 substances bound to, hepatic uptake, G13
- Aldosterone  
 apical sodium uptake, kidney cell lines (toad), C167  
 binding, isolated tubules, F606  
 biosynthesis, potassium-induced adrenal protein relations, E449  
 blood volume, cardiac output and, maternal, during pregnancy, R720  
 chloride-depletion alkalosis, normal extracellular fluid volume, F419  
 hydrogen ion secretion, distal nephron, F349  
 potassium depletion, kidney adaptation to, F329  
 production, angiotensin, calcium efflux and, E281  
 renin and, verapamil effects, E401  
 response, muscle fibers (barnacle), E230  
 sodium and potassium ion excretion, adrenalectomy, F89  
 sodium ion transport, modification of carboxyl of sodium channel (toad), F726
- Alkali, chronic ingestion, distal nephron adaptation, F349
- Alkaline, prostaglandin secretion and, from oxyntic, antral, and duodenal mucosa, G539
- Alkaline phosphatase, transport, nucleotide inhibition, proximal tubules, F263
- Alkalosis  
 chloride-depletion, normal extracellular fluid volume, F419  
 metabolic  
 chronic hyperparathyroidism, models, F450  
 disequilibrium pH method of investigation, F535

- generation, maintenance, and correction of, F425  
hydrogen ion secretion, distal nephron, F349  
ion transport and, ileal, G230  
ventilatory control in, R873  
respiratory, urinary acidification after hypocapnia, F433
- Alloperin, vascular changes and, ischemia and oxygen radicals, G285
- Alloxan  
diabetes: *see* Diabetes  
toxicity, pancreatic islet cells, neonate, E417
- Ameroid occluder, coronary collateral flow, during exercise, H131
- Amiloride  
absence of chloride-hydroxide or chloride-bicarbonate exchange, proximal tubules, F462  
action, sodium fluxes, skin (frog), R272  
apical sodium uptake, kidney cell lines (toad), C167  
dissipation, pH gradient, C157  
functional groups, sodium channel, F716  
kinin formation and, intrarenal, F198  
potassium depletion, kidney adaptation to, F329  
potassium secretion and, proximal straight tubule, F167  
sodium ion transport, sodium channel (toad), F726
- Amines, storage, Chediak-Higashi syndrome (cattle), H150
- Amino acid methyl esters, cardiac lysosomes, protein degradation and, C101
- Amino acids  
dichloroacetate effects, diabetes, E94  
dietary, adaptation to intake, kidney, F159  
inhibition, bile acid uptake, hepatocytes, G399  
osmoregulation, brain (sheep), R853  
protein synthesis regulation, lung, transport  
adaptive regulation of, intestine, G443  
ammonia effects, blood-brain barrier, C74  
brain, R556  
lacrimal gland plasma membranes, G661  
uptake, kidney brush border, newborn, F367
- $\gamma$ -Aminobutyric acid, labeled, release of, ileum (guinea pig), G717
- p-Aminohippurate, transport, renal microvillus membrane vesicles, F151
- Aminooxyacetate, ionic response impairment, pancreatic islets, E38
- Aminopyrine  
gastric acid secretion and (guinea pig), G64  
pH dependence, gastric glands, G730  
somatostatin inhibitory action, gastric glands and parietal cells, G221
- Ammonia  
amino acid transport and, blood-brain barrier, C74  
production and excretion, low environmental pH, renal (goldfish), R590  
transport, urinary bladder (turtle), F210
- Ammonia-ammonium, nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439
- Ammoniogenesis, renal, acid excretion and (dogfish), R581
- Ammonium  
handling, metabolic acidosis, proximal tubule, F680  
transport, cortical tubules, F593
- Amniotic fluid: *see* Fluid
- Amphotericin, chloride requirement, acid secretion, gastric gland, G573
- Amphotericin B  
carboxyl groups, sodium transport and, urinary bladder (toad), F707  
energy metabolism and, preimplantation blastocysts, C40  
sodium ion transport, sodium channel (toad), F726
- Amygdala, central nucleus of, parabrachial unit responses, R811
- Amygdaloid, stimulation, hemodynamic responses, spontaneous hypertension, R281
- Amylase  
alloxan diabetes and, parotid gland, G431  
release, somatostatin control of exocrine pancreatic function (guinea pig), G208  
secretion  
pancreatic, C21  
phosphodiesterase inhibitor effects, pancreatic acini (guinea pig), G676
- Anastomosis, portacaval, ammonia effects, blood-brain barrier, C74
- Anemia, splenic circulation, compartmental analysis, H17
- Anesthesia  
cardiovascular responses, noxious radiant heat, R576  
renal hemodynamics, F67
- Anesthetics, local, diffusion, superficial ventral medullary areas, H962
- Angiotensin  
afferent arteriolar diameter, hypertension, F755  
calcium efflux and, adrenal glomerulosa cells, E281  
ingestive behavior, anteroventral third cerebral ventricle lesions and, R83  
insulin suppression of, extracellular calcium effects, E531  
nephron obstruction and, hemodynamics, F75  
renal mechanisms, vascular hypertension, F131  
sympathetic responses to, R60  
vascular formation, kinase-II dependent, hepatic circulation, H849  
vasoconstriction during hemorrhage, baroreceptor denervation, H667  
vasopressin and, blood flow, following hemorrhage, H749
- Angiotensin antagonists, circulation and, liver, H849
- Angiotensin-converting enzyme inhibitor, blood flow and, renal, F408
- Angiotensin I  
intra-arterial infusions of, renal hemodynamics and, F181  
intrarenal conversion, renal blood flow and, F408
- Angiotensin II  
adrenergic potentiation, prejunctional, H662  
central, receptor blockade, sodium-deprived, awake state, R881
- chloride-depletion alkalosis, normal extracellular fluid volume, F419  
intra-arterial infusions, renal hemodynamics and, F181  
luteinizing hormone secretion and, brain, R805  
pressor effects, R906  
renal, blood flow and, F408  
renal excretion, behavioral stress and, awake state, R259  
systemic and renal effects (turtle), R837  
tubuloglomerular feedback and, renal hemodynamic actions, R186  
vasoconstrictor-evoked prostaglandin synthesis, vascular smooth muscle, C278
- Anions  
conductance, volume-induced, B lymphocytes, C160  
dysprosium, nuclear magnetic resonance (frog), C213  
exchange  
proximal tubules, F462  
renal microvillus membrane vesicles, F151  
urinary acidification, bladder (turtle), F564  
organic, parathyroid hormone extraction, F577
- Anorexia, spawning migration, liver (salmon), R827
- Anticoagulant, microvascular heparinlike species (calf), H725
- Anticonvulsants, vitamin D metabolism and, liver, E55
- Antidiuresis, vasopressin escape and, urinary prostaglandin E, F48
- Antidiuretic hormone  
antagonist action, R713  
blood, cerebrospinal fluid and, R541  
blood and third ventricle cerebrospinal fluid, dehydration, thirst, and hemorrhage, R541  
blood pressure maintenance and, dehydration, F615  
luminal membrane structure and, C289  
osmosis, cytoplasmic involvement in, urinary bladder (toad), C297  
pH effects, collecting tubules, F188  
receptor stimulation effects, left ventricular, awake state, R792  
sodium transport, sodium channel (toad), F726  
urinary concentration and, F506
- Antiestrogen, lipoprotein lipase activity, uterine and adipose, E132
- Antral gland, cell column, gastric hormone release, G463
- Antral mucosa, prostaglandin and alkaline secretion from, G539
- Antropyloric glands, gastric hormone release, G463
- Antrum  
gastric  
control of gastric emptying of solids, G334  
gastrin content, regulation of, G725  
sodium concentration changes, anomalous potential difference responses (frog), G554
- Aorta  
<sup>125</sup>I-albumin transport, pressure and stirring effects, H977  
thoracic, medial thickness, H623

Aortic wall, thoracic, thickness, H623  
 Apical membrane, urinary bladder, carbonyl groups in (toad), F707  
 Apnea, voluntary, cardiovascular functions during, R143  
 Apolysichrons, pharmacokinetic scaling, interspecies, R768  
 Apoprotein, turnover, experimental, R386  
 Arachidonic acid  
   erythroid colony formation and, C322  
   hyperactivity and, platelet-perfused heart, diabetes, H640  
   mucin secretion stimulation by, gallbladder (prairie dog), G92  
   ureteral obstruction effects, kidney, F254  
 Arginine, insulin release, gastric inhibitory polypeptide effects, E114  
 L-Arginine methyl ester, stimulation, pancreatic  $\beta$ -cells, E338  
 Arginine vasopressin: *see* Vasopressin  
 Arousal state, influences, thermoregulation (pigeon), R321  
 Arrhythmias  
   cardiac, vagus-sinoatrial node interactions, model, H1039  
   coronary occlusion and, heart (sheep), H82  
   post-cough response, age effects, R18  
   postcountershock, defibrillator safety factor with biphasic waveforms, H60  
 Arterial load: *see* Load  
 Arterial pressure: *see* Pressure  
 Arterial system, pulse-wave propagation (diamond python), R831  
 Arteries: *see* specific type and site  
 Arterioles  
   afferent, diameter, hypertension, F755  
   blood flow, gut mucosa, G29  
   cerebral, magnesium ion concentration changes and, H22  
   diameter, cubic dependence on, microvascular blood flow, H1031  
   efferent and afferent, angiotensin and tubuloglomerular feedback, R166  
   venous and arterial pressure elevation and, mesentery, H796  
 Ascites, kidney perfusion and, prostaglandin effects, F521  
 ATPase: *see* Adenosine triphosphatase; Hydrogen-potassium-ATPase; Sodium-potassium-ATPase  
 ATP: *see* Adenosine triphosphate  
 Atria: *see* Heart atria  
 Atrioventricular conduction, secondary, during vagal stimulation, H584  
 Atrioventricular node, surgically denervated heart, nicotinic sensitivity, H27  
 Atropine  
   adenosine interactions, atria (guinea pig), H475  
    $\beta$ -adrenergic control, exocrine secretion, pancreas, G690  
   hyperinsulinemia, hypothalamic obesity and, R372  
   mucosal transport and, ileal (guinea pig), G745  
   naloxone interaction, anterior pituitary hormone secretion and, E502  
   nervous control, somatostatin secretion, pancreatic, E542  
   tritiated quinuclidinyl benzilate binding and, fundic smooth muscle cells (guinea pig), G270

Autonomic drugs, hyperinsulinemia, hypothalamic obesity and, R372  
 Autonomic nervous system  
   atrioventricular conduction responses, vagal stimulation, H584  
   control, somatostatin secretion, pancreatic (pig), E542  
   pressor response mediation, cerebral ischemia, H962  
   sympathetic pathways, stomach and duodenum (guinea pig), G369  
   whole-body lymph flow and, R695  
 Autoradiography  
   aldosterone binding, kidney tubules, F606  
   cell types, pancreatic DNA synthesis, G99  
   fasting and refeeding effects, adipose tissue, E74  
   microscope, bile acid transport, liver, G681  
   regional cerebral glucose utilization, C428  
 Autoregulation  
   angiotensin-dependent renal mechanisms, vascular hypertension, F131  
   arterial sensitivity, vascular smooth muscle, H379  
   interstitial adenosine, measurement, left ventricle, H327  
   intestinal, models, G786  
   mechanisms, intrinsic, angiotensin and tubuloglomerular feedback, R166  
   renal, renin secretion rate and, F784  
   renal blood flow, development (swine), H1  
 Aversive conditioning: *see* Exercise  
 Awake state  
   adrenal responses, adrenocorticotrophic hormone, R53  
   behavioral stress, renal excretory function during, neural control, R251  
   behavior modulation, red blood cell metabolism, C457  
   blood flow and oxygen consumption, gastrointestinal, feeding effects, newborn (piglet), G697  
   blood pressure maintenance, dehydration and, H203  
   blood substitutes, method for evaluation, H519  
   cardiac denervation, vasopressin and renin response to hemorrhage, H399  
   cardiovascular reflex response, right ventricular hypertrophy, H871  
   chronic volume overload, left ventricular response to tachycardia, H218  
   experimental high-output heart failure, indomethacin effects, H942  
   left ventricular receptor stimulation effects, plasma vasopressin, R792  
   pancreatic polypeptides, hepatic extraction of, E401  
   plasma catecholamines, hypoxemia and hypercapnia effects, H924  
   pressor effects, vasopressin, R906  
   renal baroreceptor alteration, salt intake, plasma renin activity control, awake state, F119  
   renal excretion, angiotensin and behavioral stress, R259  
   renal hemodynamics, F67  
   central nervous system-induced natriuresis and, F763

sodium-deprived, blockade of brain angiotensin II receptors, R881  
 vasopressin  
   blood and cerebrospinal fluid, R549  
   blood and third ventricle cerebrospinal fluid, R541  
   voluntary apnea, cardiovascular functions during, R143

## B

Barium, intracellular activity, tracheal epithelium, C248  
 Baroreceptors: *see* Receptors  
 Baroreflexes: *see* Reflexes  
 Basal cells, antidiuretic hormone-mediated osmosis, urinary bladder (toad), C297  
 Basolateral membrane  
   betamethasone effects, developing proximal tubules, F232  
   fluidity, kidney cortex, F227  
   gastric, muscarinic receptors and guanylate cyclase, G760  
   hydraulic conductivity, video measurement, proximal tubule, F123  
   marker changes, chronic deoxycorticosterone acetate treatment, F100  
   sodium efflux, ouabain and furosemide effects, skin (frog), F312  
 Behavior  
   ingestive, gastric distension and short-term satiety (monkey), R174  
   lateralization of function, R505  
   periodic, vs. chaos, R478  
   red blood cell metabolism and, C457  
   rest states, blood flow and metabolism, R110  
 Benzimidazole, gastric secretion and, potassium chloride and insulin effects, G739  
 Bepridil, slow action potentials, dystrophic skeletal muscle, C415  
 Betamethasone, sodium-potassium-ATPase activity, proximal tubular cells, early development, F232  
 Bicarbonate  
   absorption, proximal tubule, F382  
    $^{14}\text{C}$ -labeled, kinetics, R190  
   concentration, ion transport and, ileal, G230  
   dependence, proximal tubules, F359  
   exit step, chloride dependence of, urinary acidification, bladder (turtle), F564  
   reabsorption, disequilibrium pH method of investigation, F535  
   transport  
     gastric and duodenal, prostaglandin effects, G751  
     proximal tubular fluid, F622  
     proximal tubule, F647  
     renal microvillus membrane vesicles, F151  
 Bifurcation theory, mathematics for physiology, R455  
 Bile  
   cobalamin, binding to intrinsic factor, G72  
   flow, insulin effects on, G157  
   production, perfusate hematocrit and liver perfusion, G59  
 Bile acid  
   cobalamin, binding to intrinsic factor, G72

- intracellular transport, liver, G681
- 7-oxotaurine-conjugated, biotransformation, liver, G411
- uptake, amino acid inhibition of, hepatocytes, G399
- Bile acid analogue, electron microscope autoradiography, bile acid transport, liver, G681
- Bile duct, ligation, kidney perfusion and, prostaglandin effects, F521
- Bile salt
  - biotransformation, hepatic, G411
  - colonic permeability, tight-junctional pathway role, G816
- dihydroxy
  - alterations in sodium chloride transport, colon, G808
  - deconjugated, altered jejunal macromolecular barrier induced by, G122
- insulin effects on bile flow and, G157
- permeability, taurocholate effects, G651
- Bilirubin, uptake, hepatic, G13
- Biochemical systems, temporal self-organization in, R478
- Bioenergetics, sodium ion transport, skin (frog), F691
- Biology, theoretical vs. experimental, network thermodynamics, R1
- Biorhythmicity, periodic behavior vs. chaos, R478
- Biotransformation, hepatic, 7-oxotaurine-conjugated bile acids, G411
- Bladder: *see* Gallbladder; Urinary bladder
- Blastocysts, preimplantation, energy metabolism of, C40
- Blockade
  - adrenergic, glucose production, hepatic, E616
- $\beta$ -adrenergic
  - glycogen metabolism, exercise, E166
  - lateral hypothalamic lesion-induced thermogenesis and, E535
  - prostaglandins, erythroid colony formation, C322
- dopamine, sodium excretion and, renal, F247
- entrance and exit, sinoatrial node (guinea pig), H7
- ganglionic, catecholamine secretion and, exercise (dogfish), R915
- opiate receptor, endotoxin and, cardiopulmonary responses (ewe), H189
- receptor, central angiotensin II, sodium-deprived, awake state, R881
- $\alpha$ -receptor, cerebral blood flow regulation, hypoxic newborn (lamb), H487
- vagal
  - angiotensin, baroreceptor denervation, H667
  - pancreatic polypeptide and, G178
  - pharmacologic denervation, cardiac, H592
- Blood
  - conductivity, caval occlusion effects, H580
  - constituents: *see* specific constituent
  - pH: *see* pH
- Blood-brain barrier
  - amino acid transport
  - ammonia effects, C74
  - competition for, R566
  - drug delivery, model, R303
  - glucose transport, blood pH and ischemia effects, E384
  - keto acid transport across, E253
- Blood-cerebrospinal fluid barrier, vasopressin in, R541
- Blood flow: *see also* Circulation; Microcirculation
  - arteriolar, capillary, and shunt, gut mucosa, G29
  - autoregulation, mesentery, H796
  - capillary exchange capacity, intestinal, G635
  - catecholamine effects, adipose tissue, H447
- cerebral
  - hyperglycemia and hypoglycemia, fetus (lamb), R730
  - hydroxyl radical effects, pial arterioles, H139
  - oxyhemoglobin affinity effects, H1019
  - regulation, magnesium ion concentration effects, H22
  - sympathetic effect on, hypoxic newborn (lamb), H487
- coronary
  - distal coronary pressure effects, H1054
  - histamine receptor stimulation and, H461
  - right ventricular hypertrophy, awake state, H871
- distribution
  - hypoxemia effects, sympathectomy, fetal (sheep), H767
  - temperature effects, hindpaw, H159
- gastrointestinal, feeding effects, awake state, newborn (piglet), G697
- glomerular, angiotensin and nephron obstruction, F75
- hepatic
  - renal glomerular filtration rate and, during diving (seal), R743
  - saralasin effects, H573
  - intestinal, models, G786
- jejunal, intestinal postprandial hyperemia, H437
- kidney, saralasin effects, H573
- metabolism and, rest states, forearm, R110
- microsphere and red blood cell flow and, slit and tube models, H429
- microvascular, cubic dependence on arteriolar diameter, H1031
- mucosal, electrical stimulation of ventromedial hypothalamic neurons, G265
- myocardial
  - exercise, after coronary occlusion, H131
  - histamine receptor stimulation and, H461
  - oxygen consumption and, sympathetic stimulation, skeletal muscle, H66
  - oxygen partial pressure and, cerebral, mass spectrometry, H513
- regional
  - intraorgan, plasma-soluble marker for, H707
  - vasopressin and saralasin effects, following hemorrhage, H749
- renal
  - angiotensin and tubuloglomerular feedback interactions, R166
  - angiotensin infusion and, F181
  - autoregulation, developing (swine), H1
  - fetal (sheep), H524
  - hepatic cirrhosis, prostaglandin effects, F521
  - intrarenal angiotensin I conversion, F408
- renin secretion rate and, F784
- splanchnic, saralasin effects, H573
- verapamil effects, ischemic acute kidney failure, F735
- tail, body temperature control of, R426
- uterine
  - endogenous hormones and, early pregnancy (sheep), R850
  - fluctuations during pregnancy (sheep), R843
- Blood pressure: *see also* Pressure
  - angiotensin II effects (turtle), R837
  - arterial, diving, acute barodenervation and (duck), R222
  - central angiotensin II receptor blockade, sodium-deprived, awake state, R881
  - cerebral ischemia, ventral medulla, H962
  - control, prostaglandin effects, carotid sinus, awake state (sheep), H1007
  - graded reductions and, hindlimb perfusion, exercise, H481
  - heart rate response, post-cough, R18
  - hydrocortisone effects, H1013
  - maintenance
    - dehydration and, awake state, H203
    - during dehydration, vasopressin effects, F614
    - mean right atrial, training effects (horse), R160
  - noxious radiant heat effects, anesthesia, R576
  - regulation, norepinephrine release, carotid occlusion, H635
  - sodium chloride preference, genetic hypertension, R38
  - vasopressin and adrenocorticotropin and, during hypoxia, E489
  - venous, lymph node, lymph modification and, H616
- Blood substitutes, method for evaluation, awake state, H519
- Blood vessel, myograph, ear arteries and, morphometry, H840
- Blood volume: *see also* Volume
  - arterial, hypoproteinemia effects, H284
  - cardiopulmonary, head-down tilt and, sustained hypertension, H194
  - central, high intracranial pressure effects, H947
  - central nervous system regulation, body fluid distribution, R901
  - maternal, during pregnancy, R720
  - regional, computer registration of isotope curves, H1061
- Body
  - fluid: *see* Fluid
  - mass: *see* Mass
  - weight: *see* Weight
- Bombesin
  - gastric antrum, G725
  - phosphodiesterase inhibitor effects, pancreatic acini (guinea pig), G676
  - satiety and, R927
  - stimulation, motilin release, G249
- Bone
  - calcium and proton fluxes, pH effects, F204
  - metabolism, model, R664
  - potassium effects, models, E303
- Bone marrow, erythropoiesis, prostaglandins and  $\beta$ -blockers, C322
- Bradycardia, diving, acute barodenervation (duck), R222
- Bradykinin
  - cardiovascular reflexes and, pancreatic afferent stimulation, R820

Bradykinin (*continued*)  
 microvascular permeability and, stomach, G201  
 neural excitation, cardiac spinal afferent nerves, R241

Brain  
 angiotensin II receptors, blockade of, sodium-deprived, awake state, R881  
 anteroventral third ventricle, preoptic recess lesion, renin-aldosterone system and, R901  
 asymmetry, lateralization of function, R505  
 dynamics, physical causality and, R510  
 glucose metabolism, moderate hypoxia and reoxygenation, E365  
 glucose transport, blood pH and ischemia effects, E384  
 iodothyronine homeostasis, hypo- and hyperthyroidism, E185  
 lysine transport, atypical amino acid effects, R556  
 neurochemistry, sex differences, inter-hemispheric coupling coefficients and, R151  
 nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439  
 osmotic disturbances, control of extracellular ions (skate), R853  
 renin-angiotensin system, luteinizing hormone secretion regulation, R805  
 temperature  
     during induced fever, pregnancy, R421  
     regulation (monkey), R293  
 tissue, drug delivery, model, R303  
 uptake of metabolic substrates, E253  
 volume: see Volume

Brain stem, response, phasic gastric distension, G242

Breast, milk and, adenosine monophosphate, cyclic changes (guinea pig), E549

Brody effect, caval occlusion, magnitude of unipolar atrial electrograms, H580

Brown fat  
 abnormal sympathetic function, obesity and, E87  
 cellularity, physical training effects, E8  
 control of lipolysis and respiration, adenosine (hamster), E555  
 development and activation of, pheochromocytoma PC 12 tumors, C172  
 diminished sympathetic nervous system activity, genetic obesity, E148  
 norepinephrine-induced thermogenesis, suppression by fasting, E582  
 sympathetic activity, obesity relations, R364  
 winter-acclimatized, increased  $\beta$ -adrenergic receptors in (vole), R357

Brush border, kidney, phosphate, D-glucose, and L-valine transport, newborn, F367

Brush-border membrane  
 fluidity, kidney cortex, F227  
 inorganic orthophosphate, transport and phosphorylation, F701  
 renal  
     ADP-ribosyltransferase, C449  
     phosphate uptake, dietary phosphorus effects, F175

Brush-border membrane vesicles  
 amiloride effects, sodium ion transport, C157  
 phosphate transport, nucleotide inhibition of, F263

renal outer cortical, sodium-dependent succinate transport, F374  
 sodium-hydrogen exchange, parathyroidectomy and metabolic acidosis effects, F217

Buffer nerves, stimulation, parabrachial unit response, R811

Bumetanide  
 chloride transport inhibition, cornea (frog), F660  
 sodium-potassium-chloride cotransport and, chloride site (duck), C235

Bypass: see Shunt

## C

Cadmium, mucosal transport, ileum (guinea pig), G290

Caerulein, secretin and, cell types involved in pancreatic DNA synthesis, G99

Caffeine, current, heart cells, embryo (chick), H528

Calcitonin  
 phosphate reabsorption, kidney tubular capacity, F345  
 renal concentrating mechanism and, F506  
 satiety and, R927

Calcitriol, metabolic alkalosis, chronic hyperparathyroidism, F450

Calcium  
 absorption, intestinal, measurement, G438  
 active transport, urinary bladder and colon (toad), R91  
 adenosine interactions, atria (guinea pig), H475  
 adenosine monophosphate, cyclic-mediated effects, elasmobranch rectal gland (dogfish), R894  
 adenosine monophosphate, cyclic level and, sweat gland, C189  
 bone, pH effects, F204  
 central injection, thermoregulatory response to (monkey), R76  
 depletion and repletion, heart, H343, neonate,  
 distribution, thyroid state and swimming effects, H713  
 efflux, angiotensin-mediated, adrenal glomerulosa cells, E281  
 elevation, cultured heart cells, C316  
 extracellular, renin secretion and, E531  
 flux  
     cardiac contractility and, H535  
     intestinal, pregnancy and lactation, G624  
 gastric cells, G760  
 homeostasis  
     kidney adenylate cyclase upregulation, E273  
     metabolites of vitamin D<sub>3</sub> and, E359  
     models, R664  
 hyperosmolarity, cardiac function and, diabetes, E568  
 intracellular  
     enzyme secretion from neutrophils, C196  
     tubuloglomerular feedback signals, F295  
 ischemic acute renal failure, model, F735  
 latex particle uptake and, pulmonary macrophages (hamster), C227  
 metabolism, diabetic heart, E560  
 ouabain-sensitive respiration, submandibular gland, G364

parathyroid hormone secretion and, E468  
 release, cardiac sarcoplasmic reticulum, C1  
 retention, intestinal wall, glucocorticoid effects, E143  
 sensitivity, diabetic heart, H808  
 soleus fiber ATPase, tension and, C405  
 transport, calcium load effects, kidney tubules, F515  
 uptake  
     hypoxia effects on mitochondrial function, myocardium, neonate, H998  
     sarcoplasmic reticulum, diabetes, H969  
 verapamil effects, E410

Calcium antagonists  
 carotid baroreceptors and baroreflexes, H653  
 slow action potentials, dystrophic skeletal muscle, C415  
 slow channel, myocardial adrenergic receptors, species differences (dog, rat, rabbit), H957

Calcium channel blockers  
 carotid baroreceptors and baroreflexes, H653  
 ischemic acute renal failure, model, F735

Calcium channels, vascular, organic calcium entry blockers and, vein, H1024

Calcium entry blockers, vein, calcium channels resistant to, H1024

Calcium ionophore: see Ionophore

Calcium ions  
 cytosolic free, regulation, pancreatic acinar cells, G347  
 flux, catecholamine stimulation of, myometrium, C84  
 inflow, aminooxyacetate effects, pancreatic islets, E38  
 insulin effects, fat cell ribosomes, E121  
 intracellular  
     glucose-induced retention of, pancreatic islets, C343  
     release, enzyme secretion from neutrophils, C196  
     sodium and chloride transport and, ileal, G780  
 intracellular buffers, cardiac sarcoplasmic reticulum, C1  
 myosin phosphorylation and arterial smooth muscle relaxation (swine), C271  
 smooth muscle contraction (swine), C255  
 regulation, tight-junction permeability, gallbladder (*Necturus*), C203  
 slow action potentials, skeletal muscle, C415  
 sodium and chloride transport and, intestinal, G165  
 tolerance, myocytes, left ventricular, H830

Calcium load, filtered, calcium transport and, kidney tubules, F515

Calcium-magnesium ion interactions, cerebral arterioles, H22

Calcium pool, mitochondrial and nonmitochondrial, pancreatic acinar cells, G347

Calcium stores, sodium and chloride transport, dantrolene effects, ileal, G780

Calmodulin, sodium and chloride transport, intestinal, G165

Calvariae, calcium release, pH effects, F204

- cAMP: *see* Adenosine monophosphate, cyclic
- Candidate hormone, secretion, PHI effects, pancreas, E313
- Cannulation
- chronic, adrenocorticotropin and corticosterone effects, E515
  - cold exposure and starvation effects, glucose and insulin, E575
- Capacitance, vascular, changes during high intracranial pressure, H947
- Capacity, oxidative, skeletal muscle fiber types during contraction, H265
- Capillaries
- blood flow, gut mucosa, G29
  - density
    - cremaster muscle, H368
    - intestinal, system analysis, models, G786  - exchange, countercurrent, R534
  - exchange capacity, intestinal, G635
  - filtration, pulmonary, weight and lymph flow relations, H125
  - filtration coefficient: *see* Filtration coefficient
  - peritubular, effector loci of renal nerves, F545
  - permeability: *see* Permeability
  - surface area, temperature effects, hindpaw, H159
- Capsaicin, cardiovascular reflexes and, pancreatic afferent stimulation, R320
- Captopril
- adrenergic potentiation, prejunctional, H662
  - angiotensin formation, hepatic circulation and, H849
  - renal excretory response, behavioral stress, awake state, R259
- Carbachol
- pepsinogen release and, chief cell monolayers, G641
  - phosphodiesterase inhibitor effects, pancreatic acini (guinea pig), G676
  - sodium-potassium activity, pancreatic acinar cells, G339
  - somatostatin inhibitory action, gastric glands and parietal cells, G221
- Carbodiimides, carboxyl groups, sodium transport and, urinary bladder (toad), F707
- Carbohydrates
- glucose uptake reversal and, muscle, exercise, R684
  - metabolism
    - endotoxic shock and, liver, R737
    - migration and cold (bird), R755  - microvillar activity, rapid decrease, dietary-induced, jejunoleum, G418
- Carbon dioxide
- acidosis, fatigue and phosphocreatine depletion during, C15
  - airway receptors (opossum), R209
  - distribution, hydrogen ion secretion and, fundic mucosa (bullfrog), G404
  - osmotic response and, collecting tubules, F188
  - pH and ion balance (salamander), R689
  - pressure
    - hypoxia and, nuclear magnetic resonance, skin (frog), F792
    - ion transport and, ileal, G230  - stimulation, proton secretion, membrane fusion, bladder (turtle), C113
  - total, carbonic anhydrase-dependent acidification, proximal tubule, F443
- Carbonic anhydrase
- function, proximal tubule, F443
  - immunohistochemical localization, kidney, F110
  - inhibition, disequilibrium pH method of investigation, F535
- Carbon monoxide, hypoxia, cerebrovascular response, oxyhemoglobin affinity effects, H1019
- Carboxyl group
- histidyl group, sodium channel, F716
  - sodium ion transport and, urinary bladder (toad), F707
- Cardiac cells: *see also* Heart cells; Myocardial cells; Myocytes
- hyperpermeable, energy transport, creatine phosphate shuttle, C423
- Cardiac cycle
- length, right ventricular hypertrophy, awake state, H871
  - myoglobin oxygenation, H237
  - regulation and energy oscillations, H354
- Cardiac effects, thyroid hormones, isolated heart, C328
- Cardiac enzymes, infarct size, evaluation, H413
- Cardiac impulse, channels, cables, networks, conduction and, H901
- Cardiac nerves
- intrinsic, nicotinic sensitivity, surgical denervation and, H27
  - smoke-induced stimulation, reflexes, R433
- Cardiac output
- acute barodenervation, diving responses (duck), R222
  - allometric relations (bird), H567
  - changes, reversal of renovascular hypertension and, H734
  - distribution, hypoxemia effects (lamb), H674
  - graded reductions and, hindlimb perfusion, exercise, H481
  - low, thermomodulation method, H690
  - maternal, pregnancy, R720
  - measurement by microcomputer, H178
  - vasopressin and saralasin effects, following hemorrhage, H749
- Cardioacceleration, post-cough, age effects, R18
- Cardiomyopathy
- chronic copper deficiency and, H855
  - diabetic, sodium-potassium-ATPase activity, sarcolemmal, C241
- Cardiopulmonary responses, endotoxin, opiate receptor blocker effects (ewe), H189
- Cardiorenal hemodynamics, sodium excretion and, myocardial infarction effects, H98
- Cardiorespiratory function, training effects (horse), R160
- Cardiovascular function, allometric relations (bird), H567
- Cardiovascular regulation
- amygdaloid stimulation, spontaneous hypertension, R281
  - parabrachial unit responses, R811
  - pulmocutaneous baroreflex, open-loop analysis (toad), R642
- Cardiovascular response, reflex, right ventricular hypertrophy, awake state, H871
- Cardiovascular system

 Exorbital gland, plasma membranes, resolution, G661  
 Expiration: see Respiration  
 Extensor digitorum longus muscle  
   protein metabolism, diabetes and, E604  
   sympathetic stimulation, blood flow and oxygen consumption during, H66

## F

Fanconi's syndrome, experimental, maleic acid, F339  
 Fasting  
   after exercise, ketone body turnover, E318  
   cold exposure and starvation effects, glucose tolerance and insulin response, E575  
   exercise and, splanchnic glucose metabolism, E443  
   long-term food deprivation, refeeding and, adipose tissue cells, E74  
   norepinephrine-induced thermogenesis suppression, brown adipose tissue, E582  
   refeeding and, insulin role, thermogenic responses, E160  
   starvation, sugar and amino acid transport, intestine, G443  
   weight gain after, endocrine basis for, E246  
 Fat, metabolism, migration and cold (bird), R755  
 Fat cells: see Adipocytes  
 Fatigue, muscular, carbon dioxide-induced acidosis, C15  
 Fatty acids  
   adenosine effects, brown fat metabolism (hamster), E555  
   esterification, intestinal structure and function, G358  
   free  
     mobilization, hypothalamic control, E332  
     modulation, adipocyte metabolism, E266  
     obesity, hypophagia, E211  
   hepatic uptake, G13  
   <sup>125</sup>I-labeled, esterification, cardiac glycerolipids, H693  
   oxidation, hepatic mitochondrial function, E239  
   regionally perfused, acid-induced pancreatic secretion and, G78  
   synthesis, adipose tissue, physical training and, E8  
   triglycerides, turnover, experimental model, R386  
   utilization, working heart, fetal (pig), E19  
 Febrile response, age-related deficits, R379  
 Feces, analysis, energy balance, intestinal bypass surgery, R658  
 Feedback  
   negative  
     calcium release, cardiac sarcoplasmic reticulum, C1  
     regulation, protein infusion, pancreatic response to, G394  
   tubuloglomerular  
     angiotensin and, renal hemodynamic actions, R166  
     intracellular calcium in, F295  
     regulation, nephron function, F554  
 Feeding  
   activity fronts and, isoproterenol effects, G647  
   blood flow and oxygen consumption and, gastrointestinal, awake state, newborn (piglet), G697  
   carbohydrase activity, dietary-induced decrease, jejunioileum, G418  
   carbohydrate, glucose uptake and, muscle, exercise, R684  
   dietary sodium, restriction, renal nerves and, F322  
   dietary sodium restriction, spontaneous hypertension, H1081  
   duodenal osmoconcentration and, after ingestion of hypertonic nutrients (pig), R181  
   energy balance and body weight regulation, intestinal bypass surgery, R658  
   fasting and refeeding, insulin role, thermogenic response, E160  
   food amount, prefeeding corticosterone peak, R339  
   food deprivation and refeeding effects, adipose tissue cells, E74  
   gastrin content and, antrum, G725  
   hypothalamic hyperinsulinemia, obesity and, glucocorticoid effects, E194  
   insulin-induced obesity, hypophagia during recovery from, E211  
   ketogenic diet, glucose flux and, children and adults, E373  
   photoperiodic regulation of (meadow vole), R334  
   satiety, short-term, gastric distension and (monkey), R174  
   satiety agents, peptides, R927  
   ventromedial hypothalamic obesity, guanethidine sympathectomy effects, R408  
   weight gain after fasting, endocrine basis for, E246  
 Femoral artery  
   ouabain binding, sodium-potassium-ATPase and rubidium ion uptake, H604  
   relaxation, potassium ion-induced, H598  
 Fetomaternal compartments, acute-phase  $\alpha_2$ -macroglobulin distribution, E138  
 Fetus: see also Lactation; Placenta;  
   Pregnancy  
     cardiovascular responses, arginine vasopressin (lamb), E24  
     fetomaternal compartments, distribution of acute-phase  $\alpha_2$ -macroglobulins, E138  
     glucose absorption, colon, G424  
     glucose uptake, maternal glucose production (sheep), E347  
     maternal blood volume and cardiac output, endocrinologic control, R720

venous catheterization, renal (sheep), H524  
 working heart, fatty acid and glucose utilization (pig), E19  
**Fever**  
 deficits, age-related, R379  
 induced, brain-abdomen temperature and, pregnancy, R421  
 suppression, pregnancy and, R421  
**Fiber, dietary, colonic spike activity and, G301**  
**Fiber matrix theory, single capillary permeability, colored solutes (frog), H495**  
**Fibrinogen, rouleaux formation kinetics, erythrocytes, H252, H259**  
**Fibronectin**  
 plasma, endogenously labeled, kinetics of, R564  
 synthesis, complex regulation of, cells in culture, C144  
**Fick principle**  
 arteriovenous oxygen difference, measurement by computer, H178  
 cardiovascular function, allometric relations (bird), H567  
**Filipin deoxycholate, cardiac sarcolemma, diabetes, C241**  
**Filtration**  
 glomerular  
 ammonia production and, renal (goldfish), R590  
 angiotensin II effects (turtle), R837  
 behavioral stress, angiotensin II effects, awake state, R259  
 calcium, kidney tubules, F515  
 hepatic blood flow and, during diving (seal), R743  
 neural control, awake state, R251  
 rate, angiotensin and tubuloglomerular feedback interactions, R166  
 rate, angiotensin infusion effects, F181  
 rate, betamethasone effects, developing proximal tubular cells, F232  
 renal vascular response to hyperoncotic dextran, F687  
**Filtration coefficient, capillary, intestinal, G635**  
**Fistula, aorto-caval, indomethacin effects, awake state, H942**  
**Flow**  
 coronary,  $\alpha$ -adrenoceptor stimulation, diabetic heart, H808  
 coronary collateral, during exercise, gradual coronary occlusion and, H131  
 gastroduodenal junction, species differences (cat, rabbit), G257  
 liquids and solid residue, ileocecum, G38  
 neuropsychobiological, from intermittency to transitivity in, R484  
 water  
 basolateral membrane hydraulic conductivity, F123  
 intramembrane particle aggregates and, epidermis (toad), C334  
**Flow dependence, potassium secretion, proximal straight tubule, F167**  
**Flowmetry, electromagnetic, microsphere injection, H920**  
**Flow-pulse response, left ventricular systolic dynamics, H110**  
**Fluid**  
 amniotic, arginine vasopressin, fetal responses (lamb), E24  
 body  
 balance, renal hypertension, H683

distribution, central nervous system regulation, R901  
 cerebrospinal fluid: *see* Fluid  
 deprivation, blood pressure maintenance, vasopressin effects, F615  
 hypotonic, isotonic, and hypertonic, lymph flow, thoracic duct, R785  
 intake, urinary prostaglandin E excretion and, F48  
 shifts, intercompartmental, during hemorrhage, H143  
 volume: *see* Volume  
**Fluoresceinate dye, sodium ion channels, myocardial cells, C381**  
**Fluorescence, nicotinamide adenine dinucleotide, myocardial response to hypoxia, theophylline effects, H363**  
**Fluorometry, high-pressure liquid chromatography with, adenosine quantitation, H887**  
**Follicle-stimulating hormone, secretion, atropine and naloxone interactions, E502**  
**Food intake: *see* Feeding**  
**Force-interval relations, volume overload, left ventricular response to tachycardia, H218**  
**Forearm, metabolism and blood flow, rest states, R110**  
**Forebrain, stimulation, parabrachial unit response, R811**  
**N-Formylmethionyl-leucyl-phenylalanine, enzyme release, neutrophils, C196**  
**Forskolin**  
 acid and pepsinogen secretion, gastric glands, C371  
 pH dependence, gastric glands, G730  
 Fructose, glycogen synthase and phosphorylase and, liver, E521  
**Fundic mucosa, hydrogen ion secretion by, carbon dioxide distribution (bull-frog), G404**  
**Furosemide**  
 basolateral membrane sodium efflux and, skin (frog), F312  
 chloride-bicarbonate exchange, urinary acidification, bladder (turtle), F564  
 chloride transport inhibition, cornea (frog), F660  
 mechanism of transport, renal microvillus membrane vesicles, F151  
 passive sodium and potassium ion transport, erythrocytes, C348  
 secretion and, submandibular gland, G711  
 sodium chloride symport, gastric antrum (frog), G554  
 sodium-potassium-chloride cotransport and, chloride site (duck), C235  
 thallium fluxes and, smooth muscle, uterus, F778

G

**Gain**  
 open-loop  
 baroreflex, analysis, hemorrhagic hypotension, H54  
 baroreflex, pulmocutaneous (toad), R642  
**Galactose**  
 exchange, hepatic, G1  
 glycogen and phosphorylase and, liver, E521  
**Gallbladder**  
 mucin secretion, stimulation by arachidonic acid (prairie dog), G92

tight-junction permeability, calcium ion regulation of, C203  
**Ganglia**  
 superior cervical, sympathectomy and hypothalamic obesity, R408  
 sympathetic, gastroduodenal region (guinea pig), G369  
**Ganglionic blockade: *see* Blockade**  
**Gas**  
 exchange  
 countercurrent capillary, R534  
 energy expenditure defect, E107  
 physiological, partial pressure, cerebral, H513  
**Gastric acid**  
 opiate effects (monkey), G196  
 secretion  
 electrical stimulation of ventromedial hypothalamic neurons, G265  
 omeprazole, cimetidine, and thiocyanate (guinea pig), G64  
 pentagastrin-stimulated, luminal somatostatin effects, G297  
**Gastric antrum: *see* Antrum**  
**Gastric distension**  
 brain stem response to, G242  
 short-term satiety and (monkey), R174  
**Gastric emptying**  
 secretion and, opiate effects (monkey), G196  
 short-term satiety, gastric distension and (monkey), R174  
 solids, antral control, G334  
 species differences (cat, rabbit), G257  
**Gastric epithelium, prostaglandin protective effects, G601**  
**Gastric fistula, benzimidazole effects, gastric secretion, G739**  
**Gastric function, solitary function in, phasic gastric distension, G242**  
**Gastric fundus, muscarinic cholinergic receptors, smooth muscle cells (guinea pig), G270**  
**Gastric glands**  
 acid and pepsinogen secretion, forskolin-stimulated, C371  
 acid secretion  
 chloride ion requirement, G573  
 pepsinogen secretion interaction, G775  
 pepsinogen and acid secretion, pH dependence of, G730  
 somatostatin inhibitory action, G221  
 Gastric hormones, release, antral gland cell column, G463  
 Gastric inhibitory polypeptides: *see* Polypeptides  
**Gastric mucosa**  
 damage, protective effects of prostaglandins, G601  
 gastric acid secretion, omeprazole, cimetidine, and thiocyanate (guinea pig), G64  
 hyperbaric conditions (dogfish), G236  
 oxyntic cells, current noise, chloride and potassium (frog), G797  
 protection  
 bicarbonate transport, prostaglandin effects, G751  
 mucus gel thickness, prostaglandin and damaging agent effects, G388  
 thiocyanate increase in resistance of, mechanisms (frog), G143  
 transport, neuronal stimulation effects, ileum (guinea pig), G290  
**Gastric secretion, benzimidazole-inhibited, potassium chloride and insulin effects, G739**

Gastrin  
 release, antral gland cell column, G463  
 somatostatin inhibitory action, gastric  
 glands and parietal cells, G221  
 synthesis, gastric antrum, G725  
 Gastrocnemius muscle, protein metabo-  
 lism, diabetes and, E604  
 Gastrointestinal disease, stress-induced, lu-  
 minal acidity and, R230  
 Gastrointestinal junction, determination of  
 flow across, species differences (cat,  
 rabbit), G257  
 Gastrointestinal region, peripheral sympa-  
 thetic pathways to (guinea pig),  
 G369  
 Gastrointestinal hormones, motilin release  
 and, G249  
 Gastrointestinal tract, upper, motilin ef-  
 fects (opossum), G476  
 Genetics, variation, stress and, noradrener-  
 gic system, R600  
 Glandular cells, gastric, guanylate cyclase  
 and muscarinic receptors in, G760  
 Glomerular filtration: see Filtration

 Glycolysis  
 blood, behavior modulation, red blood  
 cell metabolism, C457

cerebral, hypoxic and reoxygenation, E365  
 regulation, erythrocytes (sheep), H506  
 tolbutamide effects, myocardial energy metabolism, H313

# Glycoprotein

luminal, gastroduodenal mucus gel layer, G388

mucin secretion stimulation, arachidonic acid and, gallbladder (prairie dog), G92

Golgi apparatus, bile acid transport, liver, G681

Golgi complex, intracellular membrane populations, lacrimal gland, G133

Gonadotropins, hormone changes, portacaval anastomosis, female, E288

Granular cells, antidiuretic hormone-mediated osmosis, urinary bladder (toad), C297

Gray matter, cerebral, microvascular heparinlike species (calf), H725

Growth hormone, secretion, atropine and naloxone interactions, E502

Growth hormone-releasing factor, pancreatic, phosphatidylinositol labeling, pituitary cells, E587

Guanethidine, sympathectomy, ventromedial hypothalamic obesity and, R408

Guanine nucleotides, phosphate transport, proximal tubules, F263

Guanosine monophosphate, cyclic acid and pepsinogen interaction, gastric glands, G775

*Escherichia coli* binding, receptors, intestinal cells, G492

somatostatin control, exocrine pancreatic function (guinea pig), G208

Guanylate cyclase, muscarinic receptors and, gastric glandular cells, G760

Gut: see Intestines

# H

## Heart

aged, endurance exercise and, H560  
 anabolic effects, thyroid hormone, C328  
 calcium depletion and repletion, age effects on sarcolemma, neonate, H343  
 chronotropic response, vagal stimulation, catecholamine effects, H721  
 coronary occlusion, arrhythmias and (sheep), H82  
 cycle, myoglobin oxygenation, H237  
 denervated

nicotinic sensitivity, atrioventricular node, H27  
 vasopressin and renin response to hemorrhage, awake state, H399

## diabetic

calcium metabolism in, E560  
 enhanced sensitivity to  $\alpha$ -adrenoceptor stimulation, H808  
 prostaglandin E<sub>1</sub> effects, H1039  
 sodium-potassium-ATPase activity, sarcolemma, C241

energetics, phosphate shuttle, cardiac cells, C423

## failure

epinephrine effects, resting potential, hypertrophy, H90  
 experimental high-output, indomethacin effects, awake state, H942  
 kidney function after, H98  
 function, hyperosmolarity and, diabetes, E568

glycerolipids: see Glycerolipids  
 glycogen metabolism, spontaneous diabetes, E379

hypertrophy: see Hypertrophy

inotropic state, chronic volume overload and force-interval relations, H218

ischemic, coronary vascular resistance, hyaluronidase effects, H183

isolated, left ventricular systolic dynamics, H110

lung interdependence, H300

lysosomes, diabetes effects, C91

mass: see Mass

metabolism, chronic copper deficiency, H855

metabolism and function, ribose effects, isoproterenol treatment and, H880

multisegmental spinal sympathetic reflexes, R345

muscle: see Muscle, heart

myosin isoenzymes in, swimming effects, H713

norepinephrine turnover, endotoxemia, H276

performance, voluntary apnea, R143

permeability, macromolecules, protein and blood cell effects, H698

plasmalemma, p-face particle density of, H992

platelet-perfused, hyperreactivity, diabetes and, H640

protein metabolism, diabetes and, E604

quantitative histochemistry, Purkinje fibers, H824

responses, fade of, atrioventricular conduction during vagal stimulation, H584

sarcoplasmic reticulum, calcium release from, C1

sodium-potassium-ATPase activity, hypertension effects, H244

tissue, cathepsin-D effects, H294

volume: see Volume

## working

fatty acid and glucose utilization, fetal (pig), E19

insulin- or carnitine-treated diabetes, H969

## Heart atria

impulse origin, cycle length relations, H781

inotropic interventions, adenosine interactions (guinea pig), H475

oxygenated and hypoxic, adenosine action in, H468

unipolar electrograms, caval occlusion and, H580

## Heart cells: see also Cardiac cells;

Myocardial cells; Myocytes

caffeine-induced current, embryo (chick), H528

cultured, calcium elevation, cell injury and, C316

intracellular injections, phospholipid vesicles for, H756

## Heart rate

catecholamine effects, vagal stimulation, H721

graded reductions and, hindlimb perfusion, exercise, H481

intrinsic, pharmacologic denervation and, H592

noxious radiant heat effects, anesthesia, R576

post-cough response, age, sex, and blood pressure effects, R18

vagus-sinoatrial node interactions, model, H1039

vascular resistance and, genetic hypertension, H210

## Heart ventricles

fibrillation, coronary occlusion effects (sheep), H82

function, regional, lengthening patterns and, H741

hypertrophy: see Hypertrophy

intermittent positive-pressure ventilation, cardiovascular changes during, H300

myocytes, calcium-tolerant, isolation of, H891

sodium ion channels, tetrodotoxin-sensitive, myocardial cells, C381

## Heart ventricles, left

arterial load interaction, H773

chronic volume overload effects, tachycardia, H218

contractility, training effects (horse), R160

elevated sympathetic response, healed myocardial infarction, H646

function, kidney function after myocardial infarction, H98

interstitial adenosine, direct measurement, H327

lengthening patterns, regional circumferential, H741

myocytes, electrophysiology and ultrastructure, H830

receptor stimulation, plasma vasopressin, awake state, R792

regional function, Doppler measurement (pig), H1066

systolic dynamics, H110

## Heat

loss, low cardiac output, H690

radiant, noxious, cardiovascular responses in anesthesia, R576

Hedonism, sodium chloride preference, hypertensive, R38

## Hematocrit

arterial pressure, systemic zero flow, H453

microphotometric determination, small vessels, H167

oxygenation and, perfused liver, G769

perfusate, liver perfusion and, G59

## Hemodynamics

disturbances, microsphere injection and, H920

kidney, awake state, F67

nephron obstruction, angiotensin and, F75

renal, vasa recta autoregulation, F32

## Hemorrhage

autonomic regulation, whole-body lymph flow, R695

baroreflex open- and closed-loop analysis, H54

glucose release, intercompartmental fluid shifts due to, H143

housing and cannulation effects, E515

perturbation analysis, tubuloglomerular feedback, F554

regional blood flow, vasopressin and saralasin effects, H749

renin secretion, renal hemodynamics and, F784

- Hemorrhage** (*continued*)  
 vasoconstriction during, angiotensin and, baroreceptor denervation, H667  
 vasopressin, blood and cerebrospinal fluid, R541  
 vasopressin and renin response, cardiac denervation, awake state, H399
- Henle's loop**  
 descending limb, flow-dependent water permeability in, F743  
 development, water and electrolyte tubular transport and, F15  
 function, volume expansion and plasma chloride effects on, F41  
 potassium recycling and reabsorption, F569  
 renal concentrating mechanism, calcitonin effects, F506  
 thick ascending limb, maleic acid-induced reabsorptive dysfunction, F339  
 vasa recta autoregulation, F32
- Heparinlike species**, microvascular, anticoagulant activity (calf), H725
- Hepatocyte**, partial, vasopressin modulation of liver regeneration, G321
- Hepatic vein**  
 catheterization, epinephrine effects, E294  
 outflow, indicator-dilution studies, G1

    - intracellular chloride ion activity (newt), F359
    - metabolic acidosis, F425
    - metabolic acidosis, ammonium handling during, F680
    - metabolic acidosis/parathyroidectomy effects, sodium-hydrogen exchange, F217
    - microcirculation, effector loci of renal nerves, F545
    - passive driving forces, bicarbonate transport and, F622
    - phosphate transport, nucleotide inhibition of, F263
    - pressure, angiotensin infusion and, F181
    - reabsorption,  $\alpha$ -opamine blockade and, F247
    - succinate transport, sodium-dependent, F374
    - tetraethylammonium secretion, F238
    - urate and *p*-aminohippurate transport, F151
    - volume expansion effects, sodium chloride and sodium bicarbonate reabsorption, F272
    - water and electrolyte transport development, F15
    - water permeability, F279
  - proximal straight, potassium secretion, F167
  - reabsorption
    - neural control, awake state, R251
    - tubuloglomerular feedback regulation, F554
  - secretion, efferent plasma parathyroid extraction, F577
  - single, membrane marker changes, deoxycorticosterone acetate and, F100
  - single obstruction, angiotensin and, F75
- Kinase**
- angiotension formation, hepatic circulation, H849
  - myosin light chain
    - arterial smooth muscle relaxation (swine), C255
    - smooth muscle contraction (swine), C255
- Kinetics: see specific subject and site**
- Kinins, intrarenal formation, pH and amiloride effects, F198**

## L

- Lacrimal gland**
- exorbital, basal-lateral and intracellular membrane populations of, G133
  - plasma membranes, resolution, G661
- Lactase, dietary-induced decrease, jejunum, G418**
- Lactate**
- blood, behavior modulation, red blood cell metabolism, C457
  - dichloroacetate effects, diabetes, E94
  - generation, rest states, forearm, R110
  - gluconeogenesis, epinephrine and, E294
  - glycogen and phosphorylase and, liver, E521
  - metabolism, splanchnic, exercise and fasting effects, E443
  - metabolism and transport, kidney tubules (chicken), F142
  - utilization, myocytes, diabetes, C46
- Lactate dehydrogenase**
- cell injury and, heart cells, C316
  - monocrotaline pyrrole effects, H300
- Lactation: see also Fetus; Placenta; Pregnancy**
- adenosine monophosphate, cyclic changes, mammary gland and milk (guinea pig), E549
  - calcium flux during, intestinal, G624
  - glucose metabolism during, E351
  - $\alpha_2$ -macroglobulins, distribution of, E138
  - sugar and amino acid transport, intestines, G443
- Lanthanum, calcium paradox, heart, H343**
- Lateralization, function, R505**
- Latex particles, uptake, macrophages (hamster), C220, C227**
- Lectins, mucous components (slug), R448**
- Length-force relations, adenosine and inotropic interventions, atria (guinea pig), H475**
- Length-tension relations, arterial sensitivity, vascular smooth muscle, H379**
- Leucine, insulin release, gastric inhibitory polypeptide effects, E114**
- Leucine methyl ester, cardiac lysosomes, protein degradation and, C101**
- L-Leucine methyl ester, stimulation, pancreatic  $\beta$ -cells, E338**
- Leukocytes, monocrotaline pyrrole effects, H300**
- Leukotriene D<sub>4</sub>, hyperreactivity, platelet-perfused heart, diabetes, H640**
- Light**
- circadian clock, sleep and, R497
  - exposure, naturalistic studies of, R613
  - intensity, circadian rhythm and (monkey), R800
  - pulses and cycles, circadian activity rhythm and, R10
- Light-dark cycle, masking, circadian rhythms (monkey), R920**
- Limbic system, amygdaloid stimulation, spontaneous hypertension, R281**
- Linear function, relations, parameter estimation, model, R135**
- Lipids**
- bilayers, brain synaptosomes in, single potassium ion channels, C151
  - metabolism
    - hormone-treated and pregnant rats, E132
    - renal, unilateral ureteral obstruction effects, F254
  - photoperiodic regulation (meadow vole), R334

reutilization, granular pneumocytes, C397

**Lipogenesis**

- adipose tissue, physical training effects, E8
  - glucose metabolism, lactation, E351
  - spontaneous obesity, weight loss and (dormice), R396, R403
- Lipolysis**
- adipose tissue, catecholamine effects, H447
  - brown adipose tissue, adenosine control (hamster), E555
  - membrane potential, adipocyte, hormonal modulation of, E266
  - swim training and, obesity, R706
- Lipolytic effects,  $\alpha$ -melanocyte-stimulating hormones, three types, E47**
- Lipopolysaccharide**
- endotoxic shock, liver, R737
  - endotoxin effects, opiate receptor blocker and (ewe), H189
- Lipoprotein, turnover, experimental model, R386**
- Lipoprotein lipase**
- activity, swim training and, obesity, R706
  - fat cells, insulin regulation of, E121
  - insulin-induced obesity, hypophagia, E211
  - uterine and adipose activity, hormone-treated and pregnant rats, E132
- $\beta$ -Lipoproteins, triphasic pattern of secretion, after adrenalectomy, E60**
- Liposomes**
- degradation, granular pneumocytes fluidity, kidney cortex, F227
  - sodium or calcium filled, electrical activity and, heart cells (chick), H756
- Lithium, satiety and, R927**
- Liver**
- adenylate cyclase activity, endotoxin shock effects, R737
  - albumin-bound substances, uptake, G13
  - bile acid, intracellular transport, G681
  - biotransformation, 7-oxotaurine-conjugated bile acids, G411
  - blood flow: see Blood flow
  - cells: see Hepatocytes
  - chronic copper deficiency, H855
  - circulation: see Circulation
  - encephalopathy, ammonia and, blood-brain barrier, C74
  - experimental cirrhosis, kidney perfusion and, prostaglandin effects, F521
  - extraction, pancreatic polypeptides, awake state, E401
  - function, portacaval anastomosis, female, E288
  - glucogen synthase and phosphorylase, response to glucose and glucose analogues, E521
  - gluconeogenic enzyme activity, ventromedial hypothalamic lesion effects, E14
  - glucose metabolism, exercise and fasting effects, E443
  - glucose production
    - $\alpha$ -adrenergic stimulation of, E616
    - epinephrine-stimulated, role of gluconeogenesis, E294
  - glycogen, insulin-induced obesity, hypophagia, E211
  - glycogenolysis, exercise, R353
  - insulin agonist effects, E483
  - lipoprotein turnover, experimental, R386

lysosomes, distribution, colloidal silica, C52  
 metabolic organization, spawning migration and, (salmon), R827  
 metabolism, pancreatic polypeptides, E171  
 mitochondrial function, lean and obese, E239  
 multiple indicator-dilution studies, kinetic interpretation, G1  
 nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439  
 perfused  
   hematocrit effects on oxygenation, G769  
   hepatocyte enlargement and portal hypertension relations, G382  
   perfusate hematocrit and, G59  
   triglyceride metabolism and, G106  
 plasma clearance of vitamin D<sub>3</sub>, intestinal lymph, E326  
 regeneration, vasopressin modulation of, G321  
 resistance: *see* Resistance  
 vasopressin extraction, E611  
 vitamin D<sub>3</sub> absorption, E463  
 vitamin D metabolism, phenobarbital effects, E55  
**L**  
**Load**  
   arterial, left ventricular interaction, H773  
   glucose, intraduodenal, insulin-infused diabetes and, E200  
**Locomotor activity**, cloglyline effects (hamster), R215  
**Locus ceruleus**, genetic variation, stress and, R600  
**Loop of Henle**: *see* Henle's loop  
**Luminal membrane**  
   hydrogen ion secretion, proximal tubule, F647  
   structure, alteration of, antidiuretic hormone, C289  
**Lung**  
   endothelium, albumin permeability, H229  
   heart interdependence, H300  
   lymph: *see* Lymph  
   macrophages: *see* Macrophages  
   protein synthesis, regulation of, E508  
   surfactant, granular pneumocytes, C397  
   vascular damage, monocrotaline pyrrole, H300  
   volume: *see* volume  
**Lung cells**, alveolar epithelial, sodium ion transport, C78  
**Luteinizing hormone**  
   secretion  
     atropine and naloxone interactions, E502  
     regulation of, brain renin-angiotensin system, R805  
**Lymph**  
   intestinal  
     plasma clearance of vitamin D<sub>3</sub>, E326  
     vitamin D<sub>3</sub> absorption, E463  
   lung, endotoxin effects, opiate receptor blocker and (ewe), H189  
   modification  
     during passage through lymph node, histamine effects, H553  
     lymph nodes, H616  
**Lymph flow**  
   oxygen radicals, ischemia and, G285  
   thoracic duct, hypotonic, isotonic, and hypertonic fluid effects, R785

weight gain relations, lung, H125  
 whole-body, autonomic nervous system and, R695  
**Lymph node**  
   lymph modification, H616  
   histamine effects, H553  
**Lymphocytes**, B, volume regulation, anion transport and, C160  
**Lymphoid tissue**, gut-associated, protein transport, G54  
**Lysine**, transport, atypical amino acid effects, brain, R556  
**Lysine acetylsalicylate**, prostaglandin E effects, insulin secretion, E591  
**Lysosomes**  
   adenosine triphosphate, protection against hyperosmolar potassium chloride, C68  
   cardiac  
     amino acid methyl esters effects, C101  
     diabetes effects, C91  
   liver, distribution, colloidal silica, C52

# M

$\alpha_2$ -Macroglobulin, acute-phase, fetomaternal compartments, E138  
**Macromolecules**  
   histamine effects, microvascular permeability, stomach, G201  
   microvascular permeability to, protein and blood cell effects, H698  
**Macrophages**  
   latex particle uptake  
     calcium effects (hamster), C227  
     flow cytometry (hamster), C220  
   spleen, electrogenic sodium-potassium pump (sheep), C184  
**Macula densa**  
   chloride-depletion alkalosis, normal extracellular fluid volume, F419  
   vasa recta autoregulation, F32  
**Magnesium**  
   mucosal transport, ileum (guinea pig), G290  
   permeability: *see* Permeability  
   slow and fast muscle fibers, rest and exercise, R25  
**Magnesium adenosine triphosphatase**, tension, steady-state contractions, soleus fiber segments, C405  
**Magnesium-ATPase**, activity, myocardial, hypertension effects, H244  
**Magnesium ions**, concentration, changes, cerebral arterioles and, H22  
**Maleic acid**, reabsorptive dysfunction, proximal and distal nephron, F339  
**Mammary gland**  
   glucose metabolism, lactation, E351  
   milk and, adenosine monophosphate, cyclic changes (guinea pig), E549  
**Manganese**, pancreatic protein synthesis and, diabetes, G628  
**Mannitol**, hyperosmolarity, cardiac function and, diabetes, E568  
**Maple syrup urine disease**, brain uptake, metabolic substrates, E253  
**Mass**  
   body, photoperiodic regulation of (meadow vole), R334  
   heart, allometric relations (bird), H567  
   Mathematics, physiology, R455  
**Maturation**: *see also* Development  
   solute transport, proximal tubule, F382, F391  
**Mechanoreceptor**: *see* Receptors

**Meclofenamate**,  $\beta$ -blockade of prostaglandins, erythroid colony formation and, C322  
**Meconium**, release, fetal responses (lamb), E24  
**Meditation**, red blood cell metabolism and, C457  
**Medulla**  
   neural excitation, cardiac spinal afferent nerves, R241  
   sympathetic neurons, sequence of activation, R438  
 **$\alpha$ -Melanocyte-stimulating hormones**, bioactivities and half-lives, E47  
**Melanotropic effects**,  $\alpha$ -melanocyte-stimulating hormone, three types, E47  
**Melatonin**, photoperiodic regulation (meadow vole), R334  
**Membrane**: *see also* specific site  
   fusion, proton secretion and, bladder (turtle), C113  
   potentials: *see* Potentials  
**Mepiperphenidol**, secretion, proximal tubules, F238  
**Mesenteric artery**, dopamine effects, heterogeneity of (monkey), H930  
**Mesentery**, venous and arterial pressure, arteriolar responses to elevation, H796  
**Metabolic acidosis**: *see* Acidosis  
**Metabolic adjustments**, migration and cold (bird), R755  
**Metabolic alkalosis**: *see* Alkalosis  
**Metabolic rate**  
   capillary exchange capacity, intestinal, G635  
   clearance, neurotensin (sheep), E457  
   epinephrine sensitivity and, women, E431  
   fasting and refeeding, insulin effects, E160  
**Metabolism**: *see also* specific subject and site  
   blood flow and, rest states, forearm, R110  
   diving and recovery and (lungfish), R651  
**Metabolites**, cardiac, measurement, left ventricle, H327  
**Methionine-enkephalin**: *see* Enkephalin  
**Methionine methyl ester**, cardiac lysosomes, protein degradation and, C101  
**Methoxamine**, sensitivity, diabetic heart, H808  
**3-Methylglucose**, transport, carbohydrate effects, muscle, after exercise, R684  
**3-O-Methylglucose** absorption, colonic, colon, fetal, G424  
**1-Methyl-3-isobutylxanthine**  
   monocyte insulin receptors, regulation, E494  
   single nephron segments, incubation, F58  
**Methylprednisolone**, absorptive capacity, ileal, G562  
**Methyl sulfate**, chloride-bicarbonate exchange, urinary acidification, bladder (turtle), F564  
**Methylxanthine**, adenosine effects, brown fat metabolism (hamster), E555  
**Methysergide**, intestinal postprandial hypotension, H437  
**Metrial gland**,  $\alpha_2$ -macroglobulin distribution, E138  
**Microcirculation**: *see also* Blood flow; Circulation

- Microcirculation (continued)**  
arteriolar diameter, cubic dependence on, H1031  
cerebral, hydroxyl radical effects, pial arterioles, H139  
cortical, effector loci of renal nerves, F545  
countercurrent capillary exchange, model, R534  
cremaster muscle, H368  
hematocrit in small vessels, microphotometry, H167  
intestinal, models, G786  
macromolecules, protein and blood cell effects, H698  
microsphere and red blood cell flow and, slit and tube models, H429  
renal  
glomerular permselectivity, F485  
postglomerular permselectivity, F496  
vasa recta autoregulation, F32  
venous and arterial pressure elevation, mesentery, H796
- Microcomputer, arteriovenous oxygen difference, continuous measurement, H178**
- Microdensitometry, video, hematocrit in small vessels, H167**
- Microdissection**  
aldosterone binding, kidney tubules, F606  
solute transport, proximal tubule, F391
- Microelectrodes**  
acidification, carbonic anhydrase-dependent, proximal tubule, F443  
chloride-selective, rectal gland (shark), F640
- Microperfusion, tetraethylammonium secretion, proximal tubules, F238**
- Microphotometry, hematocrit, small vessels, H167**
- Micropuncture**  
acidification, carbonic anhydrase-dependent, proximal tubule, F443  
calcium transport, kidney tubules, F515  
epinephrine, renal potassium transport, F303  
free-flow, distal tubule, F601  
reabsorptive dysfunction, maleic acid-induced, proximal and distal nephron, F339  
renal, angiotensin infusion, F181  
renal concentrating mechanism, calcium effects, F506  
sodium excretion, renal, dopamine blockade effects, F247  
superficial nephrons, water and electrolyte transport development, F15
- Microscopy**  
electron  
respiratory acidosis, medullary collecting duct, F670  
scanning, solute transport, proximal tubule, F391  
fluorescent, histamine effects, microvascular permeability, stomach, G201  
light and electron, cardiomyopathy, chronic copper deficiency, H855
- Microspheres**  
afferent arteriolar diameter, hypertension, F755  
angiotensin and nephron obstruction, F75  
circulatory effects, hypoxemia (lamb), H674
- injection, hemodynamic disturbances as a function of, H920  
intrarenal flow, blood flow and, model, H429  
radiolabeled  
blood flow, skeletal muscle fiber contraction, H265  
blood flow, temperature effects, hindpaw, H159  
blood flow estimation, gut mucosa, G29  
cerebral blood flow regulation, hypoxic newborn (lamb), H487  
coronary collateral flow during exercise, H131  
hemodynamics, reversal of renovascular hypertension, H734  
renal venous catheterization, fetal (sheep), H524  
vasopressin and saralasin effects in hemorrhage, H749
- Microtubules, altering agents, developing  $\beta$ -cells, E391**
- Microvillus membrane, renal, phosphate, D-glucose, and L-valine, newborn, F367**
- Microvillus membrane vesicles, sodium and chloride transport, calcium ions in the control of, intestinal, G165**
- Migration, spawning, metabolic organization of liver (salmon), R827**
- Milk**  
intake, mechanism of control, suckling, R154  
mammary gland and, adenosine monophosphate, cyclic changes (guinea pig), E549
- Mineralocorticoids**  
binding sites, kidney tubules, F605  
excess, metabolic alkalosis, F425  
muscle fiber response (barnacle), E230  
sodium and potassium ion excretion, adrenalectomy, F89
- Mitochondria**  
cardiac contractility, control at cellular level, H535  
energy transport, creatine phosphate shuttle, hyperpermeable cardiac cells, C423  
fatty acid modulation, adipocyte metabolism, E266  
hepatic, function, lean and obesity, E239
- MK 421, dehydration, blood pressure maintenance and, awake state, H203**
- Models**  
blood substitutes, method for evaluation, H519  
brain, neuropsychobiological flow, R484  
calcium homeostasis, simulation of, R664  
circulation, splenic, H17  
compartmental, bicarbonate kinetics, R190  
countercurrent capillary exchange, R534  
drug delivery, cerebrospinal fluid and brain tissue, R303  
dynamic, physiology, R467  
information, data and, R620  
intracellular pH-temperature interactions, hepatocytes, R32  
left ventricular interaction, arterial load, H773  
linear, abuse of statistical packages, R299  
lipoprotein turnover, experimental, R386
- mathematical  
endocrine systems, R473  
endogenously labeled plasma fibrinogen, R564  
systems analysis of intestinal hemodynamics and oxygenation, G786  
tubuloglomerular feedback, nephron function, F554  
metabolic alkalosis, chronic hyperparathyroidism, F450  
parameter estimation, linear functional relations, R135  
pool-fraction paradigm, non-steady state turnover, R624  
rouleaux formation kinetics, erythrocytes, H252, H259  
slit and tube, microsphere and erythrocyte flow vs. blood flow, H429

vagus-sinoatrial node interactions, dynamic, H1039  
verapamil, ischemic acute renal failure, F735
- Molecules, small, pancreatic capillary permeability to, G519**
- Monocarboxylic acids, brain uptake, E253**
- Monoclonal antibodies, against hydrogen-potassium-ATPase, gastric, G589**
- Monocrotaline pyrrole, pulmonary hypertension from, H300**
- Monocytes, insulin, regulation, E494**
- Monosodium glutamate, treatment, pituitary dopaminergic receptor increase, E261**
- Morphine, motilin and, initiation of migrating myoelectric complexes, G217, G277**
- Morphometry, medullary collecting duct, respiratory acidosis, F670**
- Motilin**  
cause-and-effect relations, migrating myoelectric complexes, G277  
morphine and, initiation of migrating myoelectric complex, G217  
plasma, migrating motor complex and, pancreatic polypeptide effects, G178  
release, stimulation by bombesin, G249  
upper gastrointestinal tract, sphincter of Oddi and (opossum), G476
- Motility**  
antral, species differences (cat, rabbit), G257  
colonic,  $\alpha$ -cellulose effects, G301  
gastric, antral control, G334  
gastrointestinal, peripheral sympathetic pathways (guinea pig), G369  
ileocecal, liquids and solid residue, G38  
intestinal, motilin release, stimulation by bombesin, G249  
migrating motor complex, plasma motilin and, pancreatic polypeptide effects, G178
- Motor complex**  
interdigestive, motilin release, stimulation by bombesin, G249  
migrating, plasma motilin and, pancreatic polypeptide effects, G178
- Motor nerve, terminal membrane, heterospecific glucose transport across, C308**
- Mucin**  
secretion  
stimulation by arachidonic acid, gallbladder (prairie dog), G92  
submandibular protein phosphorylation, G44

# SUBJECT INDEX TO VOLUME 245

- Mucosa: *see* specific subject and site
- Mucus, components (slug), R448
- Mucus gel, thickness, gastric and duodenal, prostaglandin and damaging agent effects, G388
- Muscarinic receptors: *see* Receptors
- Muscle
- carbon dioxide-induced acidosis, fatigue and phosphocreatine depletion during, C15
  - forearm, blood flow during rest, R110
  - glucose uptake after exercise, carbohydrate feeding effects, R684
  - ischemia, hindlimb perfusion, exercise and, H481
  - metabolism
    - maturation and, H368
    - seasonal acclimation and (goldfinch), R265
- Muscle, heart
- contractility
    - control at cellular level, H535
    - ribose effects, H880
    - voluntary apnea, R143
  - hypertrophy: *see* Hypertrophy
  - lysosomes, diabetes effects, C91
  - lysosomes and protein degradation, amino acid methyl ester effects, C101
  - mechanics, aging effects, H72
  - protein metabolism, diabetes and, E604
  - segments, onset of relaxation (ferret), H610
- Muscle, skeletal
- blood flow, during contraction, H265
  - blood flow and oxygen consumption, sympathetic stimulation, H66
  - blood-free and protein-free perfusion, cerebrospinal fluid, H911
  - carbon dioxide-induced acidosis, fatigue and phosphocreatine depletion during, C15
  - dystrophic, calcium ion-dependent slow action potentials, C415
  - metabolism, dichloroacetate effects, diabetes, E94
  - migration, cold and, metabolic adjustments (bird), R755
  - nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439
  - protein metabolism, diabetes and, E604
  - sugar uptake, potassium ion-stimulated (frog), C125
- Muscle, smooth
- arterial, relaxation, calcium ions, myosin phosphorylation and (swine), C271
  - electrical activity, oviduct (guinea pig), C457
  - gut, flow, species differences (cat, rabbit), G257
  - mechanics, morphometry, ear, H840
  - uterine, furosemide-sensitive thallium fluxes, F778
  - vascular
    - calcium ion and myosin phosphorylation in (swine), C255
    - length-dependent sensitivity, H379
    - magnesium ion concentrations, H22
    - renal portal valve (rooster), H628
    - vasoconstrictor-evoked prostaglandin synthesis in, C278
- Muscle cells
- fundic smooth, tritiated quinuclidinyl benzilate binding in (guinea pig), G270
  - skinned, calcium release, cardiac sarcoplasmic reticulum, C1
- Muscle fibers
- aldosterone response (barnacle), E230
  - hyperpermeable, tension and, soleus muscle, C405
  - slow and fast, electrolytes in, rest and exercise, R25
  - types
    - capillarity and, cremaster muscle, H368
    - skeletal, blood flow during contraction, H265
- Muscular dystrophy, slow action potentials, calcium ion-dependent, skeletal muscle, C415
- Muscularis, blood flow estimation, gut mucosa, G29
- Muscularis mucosa, esophageal, substance P corelease with acetylcholine (opossum), G19
- Myocardial cells: *see* Cardiac cells; Heart cells; Myocytes
- cultured, defibrillator safety factor with biphasic waveforms, H60
  - intracellular injections, phospholipid vesicles for, H756
  - sodium ion channels, tetrodotoxin-sensitive, C381
- Myocardial infarction: *see* Infarction
- Myocardium
- adaptations, endurance exercise, aging, H560
  - adrenergic receptors, species differences (dog, rat, rabbit), H957
  - blood flow: *see* Blood flow

  - metabolism
    - fatty acids, H693
    - Purkinje fibers, H824
  - oxygen demand, prediction of, H533
  - thickening, Doppler measurement (pig), H1066
- Myocytes: *see* also Cardiac cells; Heart cells; Myocardial cells
- diabetic, exogenous substrate utilization, C46
  - electrophysiology and ultrastructure, left ventricular, H830
  - ventricular, calcium-tolerant, isolation of, H891
- Myoelectric activity,  $\alpha$ -cellulose effects, proximal colon, G301
- Myoelectric complex
- migrating
    - $\beta$ -adrenergic agonist effects, G647
    - cause and effect relations, motilin, G277
    - initiation, morphine vs. motilin, G217
    - motilin effects, sphincter of Oddi (opossum), G476
- Myofibril, energy transport, creatine phosphate shuttle, hyperpermeable cardiac cells, C423
- Myoglobin, oxygenation: *see* Oxygenation
- Myograph ring segments, morphometry, ear, H840
- Myometrium, primary cultures,  $\beta$ -adrenergic catecholamine-dependent properties, C84
- Myosin, cathepsin-D-catalyzed degradation and, H294
- Myosin LC2, infarct size, evaluation method, H413
- Myosin phosphorylation
- calcium ions and, arterial smooth muscle relaxation (swine), C271
  - calcium ions and adenosine monophosphate, cyclic and, smooth muscle contraction (swine), C255
- Mystatin, carboxyl groups, sodium transport and, urinary bladder (toad), F707

## N

- Naloxone
- atropine interaction, anterior pituitary hormone secretion and, E502
  - gastric function and (monkey), G196
- Naltrexone, sympathetic nervous system activity and, genetic obesity, E148
- Natriuresis
- angiotensin-dependent renal mechanisms, vascular hypertension, F131
  - central nervous system-induced, renal hemodynamics and, awake state, F763
  - sodium balance, dehydration effects, species differences (rat, rabbit, sheep), R287
- Natriuretic hormone, renal hemodynamics and, awake state, F763
- Naturalistic studies, light exposure, R613
- Necrosis, gastric, mild irritants preventing, G113
- Neonate: *see* also Newborn
- alloxan toxicity, pancreatic islet cells, E417
  - calcium paradox, heart, H343
  - hyperthyroidism, adult sympathetic stress responses and, R95
  - mitochondrial function of myocardium, hypoxia and reoxygenation effects, H998
  - oxyhemoglobin affinity effects, cerebral oxygen delivery, H1019
  - pituitary dopaminergic receptors, monosodium glutamate, E261
- Nephron
- aldosterone binding, autoradiography, F606
  - chronic obstruction, angiotensin and hemodynamic response, F75
  - distal
    - function, pH and amiloride effects, F198
    - hydrogen ion secretion by, F349
    - immunohistochemical localization of carbonic anhydrase, F110
  - function, tubuloglomerular feedback regulation, F554
  - microdissection, chronic deoxycorticosterone acetate effects, F100
  - proximal and distal, maleic acid-induced reabsorptive dysfunction, F339
  - segments, urea transport in, F634
  - single, prostaglandin  $E_2$  and vasopressin on adenosine monophosphate, cyclic, F58
  - superficial
    - loop segment, chloride absorption, F41
    - water and electrolyte transport in, F15

- Nephron** (*continued*)  
 superficial segments, chloride depletion alkalosis, F419  
 surface, ammonium handling during metabolic acidosis, F680  
**Nerves**: *see also* specific nerve and site  
 migrating myoelectric complexes, morphine versus motilin, G217  
 prostatic secretion and, F470  
 recording, upper airway stimulation with smoke, R433  
 transmural stimulation  
 adrenergic control, ear, H320  
 relaxation of saphenous vein and, H1073  
**Neural control**  
 acid-induced serotonin release, duodenum, G824  
 renal excretory function, behavioral stress, awake state, R251  
**Neural excitation**, widespread, cardiac spinal afferent nerves, R241  
**Neural mechanism**, intestinal postprandial hyperemia and, H437  
**Neurochemistry**, brain, sex differences, interhemispheric coupling coefficients and, R151  
**Neurohumoral agents**, serotonin release and, duodenal, G824  
**Neuromuscular junction**, glucose transport, electrophysiological study, C308  
**Neurons**  
 insulin receptor regulation, neurons, C283  
 intracardiac, nicotinic sensitivity, surgical denervation, H27  
 regulation, insulin and tunicamycin effects, C283  
 stimulation, mucosal transport and, ileum (guinea pig), G290  
 sympathetic: *see* Sympathetic neurons  
 ventromedial hypothalamic, electrical stimulation of, gastric acid secretion and, G265  
**Neuropsychobiological flow**: *see* Flow  
**Neurotensin**, metabolism, organ and plasma (sheep), E457  
**Neurotransmitters**, release, mucosal transport and, ileum (guinea pig), G745  
**Neutrophils**, enzyme release from, FMLP-induced, C196  
**Newborn**: *see also* Neonate  
 blood flow and oxygen consumption, gastrointestinal, feeding effects, awake state (piglet), G697  
 hypoxic, sympathetic effect on cerebral blood flow regulation (lamb), H487  
**Nicotinamide**  
 ADP-ribosyltransferase, renal brush-border membranes, C449  
 uptake, intestines (chick), G531  
**Nicotinamide adenine dinucleotide**  
 ADP-ribosyltransferase, renal brush-border membranes, C449  
 fluorescence: *see* Fluorescence  
**Nicotinamide adenine nucleotide**, biosynthesis, intestines (chick), G531  
**Nicotine**  
 carotid chemoreceptor reflex, right ventricular hypertrophy, awake state, H871  
 sensitivity, atrioventricular node, surgical denervated heart, H27  
**Nifedipine**  
 calcium channels resistant to, vein, H1024  
 carotid baroreceptors and baroreflexes, H653  
**Nipple**, shifting, milk intake control and, suckling, R154  
**Nitrogen-14**, nuclear magnetic resonance spectroscopy, mammalian tissue, C439  
**Nitroprusside**  
 renin secretion, renal hemodynamics and, F784  
 venous return, regional, chronic congestion and, H814  
**Noradrenergic system**, central and peripheral, genetic variation, stress and, R600  
**Norepinephrine**  
 adrenergic control, arteries of ear, H320  
 blood pressure maintenance, dehydration, awake state, H203  
 brown fat receptors, winter-acclimatized (vole), R357  
 chronotropic response, vagal stimulation, H721  
 contractile response, adenosine effects, atria, H468  
 contractions and, coronary artery, H937  
 dietary sodium restriction, renal nerves and, F322  
 disposition, large and small pulmonary artery, H104  
 endogenous, uptake inhibitor, plasma, H336  
 glucose production and, hepatic, E616  
 high salt diet, genetic hypertension, H762  
 hypoxemia and hypercapnia effects, awake state, H924  
 influence, adipose tissue, H447  
 ischemic acute renal failure, model, F735  
 left ventricular hypertrophy, isovolumic indexes and, H33  
 neonatal hyperthyroidism, adult stress and, R95  
 nerve stimulation, relaxation of saphenous vein, H1073  
 plasma, pathogenesis of hypertension and, F1  
 release, carotid occlusion, H635  
 secretion, ganglionic blockade effects, exercise (dogfish), R915  
 sympathoadrenal responses, ischemic injury, E67  
 thermogenesis, fasting effects, brown fat, E582  
 turnover  
 cardiac and splenic, endotoxemia, H276  
 obesity and, E87  
 sympathetic activity and obesity relations, R364  
 sympathetic nervous system, genetic obesity, E148  
 vasoconstrictor-evoked prostaglandin synthesis, vascular smooth muscle, C278  
**Nuclear magnetic resonance**  
 cardiomyopathy, chronic copper deficiency, H855  
 sodium ions, skin (frog), C213  
 variations in carbon dioxide pressure and hypoxia, skin (frog), F792  
**Nucleophile**, functional groups, sodium channel, F716  
**Nucleotides**  
 adenine, mitochondrial function of myocardium, neonate, H998  
 inhibition, phosphate transport, proximal tubules, F263  
**Nucleotides**, cyclic, changes, mammary gland and milk (guinea pig), E549  
**Nucleus solitarius**, phasic gastric distension, G242  
**Nutrients**  
 hypertonic, duodenal osmoconcentration and feeding after (pig), R181  
 oxidation, <sup>13</sup>C-labeled bicarbonate, R190  
**Nutrition**: *see also* Feeding  
 parenteral, cholecystokinin and secretin effects, intestines, G358

O

- Obesity**  
 abnormal sympathetic function and, E87  
 diet-induced, sympathetic activity and, R364  
 energy balance, intestinal bypass surgery, R658  
 fasting and refeeding effects, adipose tissue, E74  
 genetic  
 diminished sympathetic nervous system activity, E148  
 thermogenic responses, fasting and refeeding, insulin effects, E160  
 hepatic mitochondrial function, E239  
 hyperinsulinemia of, decreased insulin clearance and, E155  
 hypothalamic hyperinsulinemia and, R372  
 adrenal glucocorticoid effects, E194  
 insulin-induced, recovery from, hypophagia during, E211  
 spontaneous, weight loss and (dormice), R396, R403  
 swimming and, lipoprotein lipase activity and lipolysis after, R706  
 ventromedial hypothalamic, guanethidine sympathectomy, R408  
**Octanoic acid**  
 calcium metabolism and, diabetic heart, E560  
 working heart, fetal (pig), E19  
**Oleate**, intraduodenal, acid-induced pancreatic secretion and, G85  
**Oleic acid**  
 intraduodenal emulsions, pancreatic secretion induced by, G85  
 nerves, intestinal postprandial hyperemia, H437  
 pancreatic secretion induced by, fatty acids and, G78  
 ureteral obstruction effects, kidney, F254  
**Omeprazole**, gastric acid secretion and (guinea pig), G64  
**Open-loop gain**: *see* Gain  
**Opiates**  
 endogenous, gastric function and (monkey), G196  
 motilin and, initiation of migrating myoelectric complexes, G277  
 receptor blockade: *see* Blockade receptors: *see* Receptors  
**Organ**, metabolism of neurotensin (sheep), E457  
**Ornithine decarboxylase**, polyamine biosynthesis, after jejunectomy, G656  
**Orthophosphate**, inorganic, transport and phosphorylation, renal membrane, F701  
**Oscillation**, mathematics for physiology, R455

Oscillators, relaxation, morphine vs. morphine, G217  
 Oscillography, spinal cord, R751  
 Osmoconcentration, duodenal, food intake and, after hypertonic nutrient ingestion (pig), R181  
 Osmolality  
   hepatocyte enlargement, portal hypertension relations, G382  
   plasma, daily sodium intake effects, R860  
   urinary prostaglandin  $E_2$  excretion, dehydration and, R329  
 Osmolarity, urinary, DOCA-saline hypertension, R633  
 Osmoregulation  
   brain (skate), R853  
   sodium transport, esophageal (flounder), R888  
   urinary bladder (fish), R45  
   vasopressin and, dehydration, thirst, and hemorrhage, R541  
 Osmosis, antidiuretic-hormone mediated, cytoplasmic involvement in, urinary bladder (toad), C297  
 Osmotic disturbances, brain, control of extracellular ions (skate), R853  
 Osteomalacia, phenobarbital treatment effects, vitamin D metabolism, liver, E55  
 Ouabain  
   arterial binding, sodium-potassium-ATPase and rubidium ion uptake, H604  
   basolateral membrane sodium efflux and, skin (frog), F312  
   electrogenic sodium-potassium pump, spleen macrophages (sheep), C184  
   energy metabolism and, preimplantation blastocysts, C40  
    $^3H$ -labeled, sodium-potassium pump activity, pancreatic acinar cells, G339  
   particle uptake, calcium effects, macrophages (hamster), C227  
   potassium secretion and, proximal straight tubule, F167  
   respiration, cholinergic stimulation, submandibular gland, G364  
   secretion and, submandibular gland, G711  
   sodium chloride symport, gastric antrum (frog), G554  
   sodium ion transport, sodium channel (toad), F726  
   transport, proximal tubule, F382  
   vasopressin inhibition, cortical collecting tubules, F772  
 Ovariectomy  
   atropine and naloxone interactions, anterior pituitary hormone secretion, E502  
   blood flow, uterine, during pregnancy (sheep), R843  
 Oviduct, smooth muscle, electrical activity (guinea pig), C357  
 Ovulation, angiotensin II effects, brain, R805  
 $\beta$ -Oxidation, fatty acid and glucose utilization, working heart, fetal (pig), E19  
 Oxidative capacity: *see* Capacity  
 7-Oxodeoxycholytaurine, bile acids, hepatic biotransformation, G411  
 7-Oxolithocholytaurine, bile acids, hepatic biotransformation, G411  
 Oxygen  
   arteriovenous difference, continuous

  measurement by microcomputer, H178  
   availability, cerebral glucose metabolism after hypoxia, E365  
   consumption  
     aging and exercise effects, heart, H560  
     allometric relations (bird), H567  
     arteriovenous, measurement by microcomputer, H178  
     blood flow and, sympathetic stimulation, skeletal muscle, H66  
     diabetic myocytes, C46  
     gastrointestinal, feeding effects, awake state, newborn (piglet), G697  
     lateral hypothalamic lesion-induced thermogenesis, E535  
     rest states, forearm, R110  
     thermogenesis, fasting effects, brown adipose tissue, E582  
   delivery-to-demand ratio, intestinal, G635  
   difference, arteriovenous, intestinal, G635  
   gastric mucosa (dogfish), G236  
   partial pressure, during hypoxia, E489  
   uptake  
     hematocrit effects, liver, G769  
     ouabain-sensitive, submandibular gland, G364  
     training effects (horse), R160  
 Oxygenation  
   developmental changes in, hypoxemia (lamb), H674  
   hematocrit effects, perfused liver, G769  
   intestinal, systems analysis, models, G786  
   myoglobin, cardiac cycle, H237  
 Oxyhemoglobin dissociation curve, cerebrovascular response and, carbon monoxide hypoxia, H1019  
 Oxyntic cells, current noise, potassium and chloride, gastric mucosa (frog), G797  
 Oxyntic mucosa, prostaglandin and alkaline secretion from, G539

## P

Pacemaker  
   annihilation, electronic inhibition and summation, Purkinje fibers, H42  
   circadian, clorgyline effects (hamster), R215  
   site, cycle length relations, H781  
   vagus-sinoatrial node interactions, model, H1039  
 Pacing, rapid, sinoatrial node (guinea pig), H7  
 Pain, noxious radiant heat, anesthesia, R576  
 Palmitic acid  
   oxidation of, energy expenditure defect, E107  
   utilization, myocytes, diabetes, C46  
   working heart, fetal (pig), E19  
 Pancreas  
   alloxan toxicity, neonate, E417  
   amylase secretion, decline in, C21  
   capillaries, permeability to small molecules, G519  
   exocrine  
     enzyme secretion, C21  
     function, bimodal regulation by somatostatin-28 (guinea pig), G208  
     protein synthesis, manganese effects, diabetes, G628  
     secretion,  $\beta$ -adrenergic control of, G690

  hormonal secretion from, PHI effects, E313  
   microtubule-altering agents, during development, E391  
   perfusion, L-leucine methyl ester stimulation, E338  
   phosphate efflux, during protein secretion, C121  
   response, protein infusion, intestinal, G394  
   secretion  
     acid-induced, fatty acids and, G78  
     acid-induced, intraduodenal oleate and, G85  
     cholecystokinin-58 biological activity, G313  
     intestinal structure and function and, G358  
   somatostatin secretion  
     autonomic nervous control of (pig), E542  
     paracrine role in, E598  
 Pancreatic acinar cells  
   cytosolic free calcium ion regulation, G347  
   intracellular membrane populations, lacrimal gland, G133  
   phosphate efflux, during protein secretion, C121  
   sodium-potassium pump activity, secretagogue regulation of, G339  
 Pancreatic acini  
   cholecystokinin, bombesin, and carbachol actions, phosphodiesterase inhibitor effects (guinea pig), G676  
    $^{125}I$ -secretin binding to (guinea pig), G186  
   natural glucagon effects (guinea pig), G703  
 Pancreatic afferents: *see* Afferents  
 Pancreatic cells  
    $\beta$ -  
     developing, microtubule-altering agent effects, E391  
     function, calcium and, C343  
     L-leucine methyl ester stimulation of, E338  
 Pancreatic islets  
   glutamate dehydrogenase, L-leucine methyl ester stimulation of, E338  
   intracellular calcium ions, glucose-induced retention of, C343  
   ionic response, aminooxyacetate effects, E38  
 Panting, thermoregulation, circadian and arousal state influences (pigeon), R321  
 Papaverine, microvascular permeability and, stomach, G201  
 Papillary muscle: *see* Muscle, heart  
 Parabrachial unit, response, buffer nerve and forebrain stimulation, R811  
 Paracrine, somatostatin and, pancreatic, E598  
 Parameters, estimation, linear functional relations, R135  
 Parasympathetic nervous system  
   atrioventricular conduction responses, vagal stimulation, H584  
   vagus-sinoatrial node interactions, model, H1039  
 Parathyroid cells  
   hexose monophosphate shunt and, E468  
   hormone secretion, membrane potential and (bovine), E102

- Parathyroidectomy, metabolic acidosis and, sodium-hydrogen exchange, brush-border vesicles, F217
- Parathyroid hormone  
calcium homeostasis and, model, R664  
extraction, cortical efferent vessel plasma, F577
- pH effects and, bone calcium and proton fluxes, F204
- phosphate reabsorption and, renal tubules, F345
- phosphate transport and, distal tubule, F601
- potassium effects, bone, models, E303  
receptors: *see* Receptors  
secretion  
  membrane potential and, parathyroid cells (bovine), E102  
  role of hexose monophosphate shunt, E468  
  sodium-hydrogen exchange and, brush-border vesicles, F217  
  urinary concentration and, F506
- Parietal cells  
  gastric acid secretion, omeprazole, cimetidine, and thiocyanate (guinea pig), G64  
  gastric hydrogen-potassium-ATPase, monoclonal antibodies against, G589  
  muscarinic receptors, guanylate cyclase and, gastric, G760  
  somatostatin inhibitory action, G221  
  stimulated, gastric acid secretion, luminal somatostatin effects, G297
- Parotid gland, alloxan diabetes, insulin and, G431
- Pars recta, potassium secretion, F167
- Particle, p-face, density, cardiac plasma-lemma, H992
- Particle collision theory, platelet aggregation, R776
- Partition coefficient, lipid-to-water, organic acids and intracellular pH (sheep), C178
- Pectoralis muscle, seasonal acclimation and (goldfinch), R265
- Pentagastrin, gastric acid secretion, luminal somatostatin effects, G297
- Pentobarbital, renal hemodynamics, F67
- Pepsin, benzimidazole inhibition, gastric secretion, G739
- Pepsinogen  
  pH dependence, gastric glands, G730  
  release, chief cell monolayers, G641  
  secretion  
    acid secretion interaction, gastric glands, G775  
    forskolin-stimulated, gastric glands, C371  
    gastric glandular cells, G760
- Peptides: *see also* Polypeptides  
  chemotactic, enzyme secretion from neurophils, C196  
  proopiomelanocortin-derived, adrenalectomy effects, E60  
  satiety effects, R927  
  vasoactive intestinal  
    secretin binding, pancreatic acini (guinea pig), G186  
    sodium-potassium pump activity, pancreatic acinar cells, G339
- Perfusion  
  blood-free and protein-free, cerebrospinal fluid, hindlimb, H911  
  fatty acid, acid-induced pancreatic secretion and, G78
- isovolumic exchange, blood substitutes, awake state, H519
- liver  
  albumin-bound substances, G13  
  perfusate hematocrit and, G59  
  triglyceride metabolism and, G10v  
  pressure: *see* Pressure
- Pericardial superfusion, adenosine concentration measurement, cardiac, H1085
- Peripheral artery, dopamine effects, heterogeneity of (monkey), H930
- Peristalsis, descending inhibition, colonic propulsion, G307
- Permeability  
  bicarbonate, proximal tubular fluid, F622  
  biliary, taurocholate effects, G651  
  capillary  
    albumin, lung endothelium, H229  
    computer registration of isotope curves, H1061  
    drug delivery and, model, R303  
    intermediate-sized colored solutes (frog), H495  
    ischemia-induced vascular changes, oxygen radicals and, G285  
    pancreatic, small molecules, G519  
    perfusion, cerebrospinal fluid, hindlimb, H911  
  chloride, furosemide inhibition of, cornea (frog), F660  
  colonic, bile salt-induced, tight-junctional pathway role, G816  
  coronary, protein and blood cells, macromolecules, H698  
  epithelial, urinary bladder (toad), C28  
  glucose, motor nerve terminal membrane, C308  
  luminal membrane, tetraethylammonium secretion, proximal tubules, F238  
  magnesium, esophagus (flounder), R888  
  membrane potassium, tracheal epithelium, C248  
  microvascular, histamine effects on, stomach, G201  
  passive, ammonia, urinary bladder (turtle), F210  
  phosphate efflux, pancreas, C121  
  tight-junction, calcium ion regulation of, gallbladder (*Necturus*), C203  
  urea, nephron segments, F634  
  vascular, histamine effects on lymph passage through lymph node, H553  
  water  
    flow-dependent, Henle's loop, F743  
    pathways and, proximal tubule, F279  
    pH effects, collecting tubules, F188
- Permeability coefficient, osmotic, taurocholate effects, G651
- Permeability  
  glomerular, neutral dextrans, F485  
  postglomerular, neutral dextrans, F496
- Peroxidase, alloxan diabetes and, parotid gland, G431
- Peyer's patches, jejunum and, protein transport across, G54
- pH  
  ammonium handling and, proximal tubule, F680  
  blood, cerebral glucose transport and, E384  
  bone calcium, proton fluxes and, F204  
  buffering, calcium release, cardiac sarco-plasmic reticulum, C1  
  carboxyl groups, sodium transport and, urinary bladder (toad), F707
- cell, calcium ions and, intestinal, G165  
dependence  
  pepsinogen and acid secretion, gastric glands, G730  
  rouleaux formation, erythrocytes, H252, H259  
  vasopressin and 8-CPT-adenosine monophosphate, cyclic, kidney tubules, F188  
environmental, low, ammonia and, renal (goldfish), R590  
functional groups, sodium channel, F716  
gastric, stress-induced gastroduodenal disease, R230  
gradient, amiloride dissipation of, C157  
intracellular  
  nuclear magnetic resonance, skin (frog), F792  
  organic acid effects (sheep), C178  
  temperature interactions and, hepatocytes, R32  
ionic balance and, hypercapnia (salamander), R689  
kinin formation and, intrarenal, F198  
microelectrode, proximal tubules, F462  
systemic, ion transport and, ileal, G230  
urinary acidification, after hypocapnia, F443
- Pharmacokinetics  
  cerebrospinal fluid, brain tissue and, model, R303  
  scaling, Dedrick plots and, interspecies, R768
- Phenazine methosulfate, parathyroid hormone secretion and, E468
- Phenobarbital, treatment effects, vitamin D metabolism, liver, E55
- Phenoxybenzamine, nervous control, somatostatin secretion, pancreatic, E542
- Phentolamine  
   $\beta$ -adrenergic control, exocrine secretion, pancreas, G690  
  glucose production and, hepatic, E616  
  hyperinsulinemia, hypothalamic obesity and, R372  
  sensitivity, diabetic heart, H808
- Phenylalanine, thyroid hormone and, isolated heart, C328
- Phenylalanine methyl ester, cardiac lysosomes, protein degradation and, C101
- Phenylethanolamine *N*-methyltransferase, high-salt diet, genetic hypertension, H762
- Pheochromocytomas, brown fat in, C172
- PHI, hormonal secretion and, pancreas, E313
- Phosphatase  
  myosin light chain, arterial smooth muscle relaxation (swine), C255  
  phosphoprotein, renal membrane, F701
- Phosphate  
  efflux, during protein secretion, pancreatic acinar cells, C121  
  energy-rich, diabetic myocytes, C46  
  high-energy, cardiac cycle, H354  
  reabsorption, renal tubular capacity for, calcitonin effects, F345  
  transport  
    kidney brush border, newborn, F367  
    kidney cell line, F22  
    nucleotide inhibition of, proximal tubules, F263  
    potassium effects, kidney, F601  
  uptake, high and low phosphorus diet ef-

- fects, membrane vesicles, renal, F175
- Phosphatidylcholine, liposomal, uptake, granular pneumocytes, C397
- Phosphatidylinositol, pancreatic growth hormone-releasing factor stimulation, anterior pituitary cells, E587
- Phosphocreatine
  - bioenergetics of sodium ion transport, skin (frog), F691
  - carbon dioxide pressure and hypoxia variations, skin (frog), F792
  - cardiac lysosomes, protein degradation and, C101
  - chronic copper deficiency, H855
  - depletion, carbon dioxide-induced acidosis, muscle, C15
  - myocytes, diabetes and, C46
- Phosphodiesterase inhibitors, cholecystikinin, bombesin, and carbachol, pancreatic acini (guinea pig), G676
- Phosphoenolpyruvate carboxykinase activity in liver and kidney, ventromedial hypothalamic lesion effects, E14
- glucose release and, kidney, diabetes, F223
- Phosphofructokinase
  - tolbutamide effects, myocardial energy metabolism, H313
  - working heart, fetal (pig), E19
- Phospholipids
  - metabolism, anterior pituitary cells, E587
  - ureteral obstruction effects, kidney, F254

  - pancreatic secretion induced by, fatty acids and, G78
  - sodium-potassium pump activity, pancreatic acinar cells, G339
- Secretory epithelia, rectal gland, chloride secretion (shark), F640
- Self-organization, temporal, biochemical systems, R478
- Sensitivity, length-dependent, vascular smooth muscle, H379
- Sepsis, cardiopulmonary response, opiate receptor blocker effects (ewe), H189
- Serotonin
  - accumulation, granules of storage pool-deficient platelets (cattle), H150
  - acid-induced release, neural control of, duodenum, G824
- Serum albumin, amino acid and insulin effects, lung, E508
- Sex differences
  - brain neurochemistry, interhemispheric coupling coefficients and, R151
  - endocrine consequences, portacaval anastomosis, E288
  - epinephrine sensitivity, women, E431
  - heart rate response, post-cough, R18
- Shivering, thermoregulation, circadian and arousal state influences (pigeon), R321
- Shock
  - cellular mechanisms in, R117
  - endotoxic, adenylate cyclase activity and, liver, R737
- Shunt
  - arteriovenous
    - maternal blood volume control, pregnancy, R720
    - temperature effects, blood flow, hind-paw, H159
  - blood flow, gut mucosa, G29
  - hexose monophosphate, parathyroid hormone secretion and, E468
- Sialic acid, sodium-potassium-ATPase activity, hypertension, H244
- Sinoatrial node
  - electronic interactions in (guinea pig), H7
  - vagus node interactions, model, H1039
- Sinus nerve, efferent, carotid body chemoreception, chronic hypoxia, R678
- Sinus node, pacemaker site, cycle length relations, H781
- Skin
  - forearm, blood flow during rest, R110
  - nuclear magnetic resonance spectra of, carbon dioxide pressure and hypoxia variations (frog), F792
  - sodium efflux, basolateral membrane, ouabain and furosemide (frog), F312
  - sodium ions in, nuclear magnetic resonance (frog), C213
  - sodium ion transport
    - bioenergetics of (frog), F691
    - regulation of (frog), R272
- Sleep
  - circadian clock and, R497
  - light exposure and, R613
  - REM, thermoregulation and (pigeon), R321
- Small bowel, bypass, cholecystokinin and secretin effects, G358
- Smoke, upper airway stimulation, sympathetic outflow during, R433
- Sodium
  - active transport, esophageal (flounder), R888
  - apical uptake, kidney epithelial cell line A6 (toad), C167
  - balance, hypertension, R38
  - cell injury and, heart cells, C316
  - chloride and, transport, dantrolene effects, ileal, G780
  - control of, brain osmoregulation (sheep), R853
  - depletion
    - adrenergic potentiation, prejunctional, H662
    - circulatory homeostasis, saralasin effects, H573
    - dehydration effects, species differences (rat, rabbit, sheep), R287
    - deprivation, central angiotensin II receptor blockade, awake state, R881
  - excretion
    - behavioral stress, angiotensin II effects, awake state, R259
    - cardiorenal hemodynamics and, myocardial infarction effects, H98
    - central nervous system distribution, R901
    - central nervous system-induced, awake state, F763
    - hypertension and, F1
  - neural control of, awake state, R251
  - renal, dopamine blockade and, F247
  - urinary, DOCA-saline hypertension, R633
  - water deprivation effects, urinary, R329
- intake
  - daily, vasopressin secretion and drinking and, R860
  - low, blood pressure and, spontaneous hypertension, H1081
- reabsorption and recycling, Henle's loop, F569
- restriction, dietary, kidney adaptation to, renal nerves and, F322
- secretion
  - adenosine monophosphate, cyclic effects, rectal gland (dogfish), R894
  - prostatic, F470
- slow and fast muscle fibers, rest and exercise, R25
- succinate transport, brush-border membrane vesicles, F374
- transepithelial transport, skin, nuclear magnetic resonance (frog), C213
- transmembrane gradients, amino acid inhibition of bile acid uptake, hepatocytes, G399
- transport
  - active intestinal, calcium ion effects, G165
  - control of, urinary bladder (fish), R45
  - ileal brush border, G504
  - lung cells, C78
  - methylprednisolone effects, ileum, G562
  - muscle fibers (barnacle), E230
- Sodium azide, pH effects and, bone calcium and proton fluxes, F204
- Sodium bicarbonate, reabsorption, volume expansion effects, proximal tubules, F263
- Sodium-calcium exchange
  - cardiac contractility and, H535
  - heart cells, embryo (chick), H528
  - urinary bladder, colon and (toad), R91
- Sodium channel
  - carboxyl, aldosterone action on sodium ion transport (toad), F726
- transport, functional groups, F716
- Sodium chloride
  - absorption, proximal tubules, F462
- cotransport
  - adenosine monophosphate, cyclic effects, rectal gland (dogfish), R894
  - cornea (frog), F660
  - diuretic effects, tracheal epithelium, C388
  - insulin effects on bile flow, G157
  - preference, hypertension, R38
  - reabsorption, volume expansion effects, proximal tubules, F263
  - sympathetic responses to, R60
- transport
  - colon, G668
  - dihydroxy bile salt-induced alterations, colon, G808
- Sodium chloride symport
  - potential difference, gastric antrum (frog), G554
  - sodium chloride transport and, colon, G808
- Sodium-hydrogen exchange
  - mechanism, proximal tubule, F647
  - metabolic acidosis and parathyroidectomy effects, brush-border vesicles, F217

- Sodium-hydrogen exchange (*continued*)  
sodium and chloride transport, ileal brush border, G504
- Sodium ion-calcium ion exchange, cell injury, heart cells, C316
- Sodium ion channels, tetrodotoxin-sensitive, myocardial cells, C381
- Sodium ions  
epithelial cell growth and, kidney (monkey), C365  
excretion, mineralocorticoid effects, adrenalectomy, F89  
hydrogen ion-dependent transport, amiloride effects, C157  
intracellular concentrations, flow cytometry (hamster), C220  
passive transport, erythrocytes, sulfhydryl binding agents and furosemide, C348  
requirement, acid secretion, gastric gland, G573  
skin, nuclear magnetic resonance (frog), C213  
sodium pump and, transport and enzymatic activity, G327  
transport  
aldosterone action on (toad), F726  
carboxyl groups and, urinary bladder (toad), F707  
monolayers, pulmonary alveolar epithelial cells, C78  
preimplantation blastocysts, C40  
regulation, skin (frog), R272  
skin, bioenergetics of (frog), F691
- Sodium pool, intracellular, nuclear magnetic resonance (frog), C213
- Sodium-potassium-ATPase activity  
betamethasone effects, proximal tubular cells, early development, F232  
myocardial, hypertension effects, H244  
sarcolemmal, diabetic heart, C241  
nerve stimulation, relaxation of saphenous vein, H1073  
ouabain binding, arteries, H604  
ouabain-sensitive respiration, submandibular gland, G364  
potential difference, gastric antrum (frog), G554  
renal, chronic deoxycorticosterone acetate effects, F100
- Sodium-potassium-chloride cotransport, bumetanide inhibition, chloride site (duck), C235
- Sodium-potassium pump: *see* Pump
- Sodium pump: *see* Pump
- Soleus muscle  
fiber segments, steady-state contractions, tension and ATPase rates, C405  
protein metabolism, diabetes and, E604
- Solids, gastric emptying, antral control of, G334
- Solutes  
intermediate-sized colored, permeability of single capillaries to (frog), H495  
rejection, <sup>125</sup>I-albumin transport, aortic, H977  
transport, development, proximal tubule, F382, F391
- Solute-solvent coupling: *see* Coupling
- Solvent drag, transepithelial, gradient dependence of hydrogen ion secretion, F622
- Somatomammotropin, chorionic, blood volume control, maternal, during pregnancy, R720
- Somatostatin  
excretion, PHI effects, pancreas, E313  
glucose production and, hepatic, E616  
inhibitory action of, gastric glands and parietal cells, G221  
luminal, pentagastrin-stimulated gastric acid secretion and, G297  
pancreatic and phospholipid metabolism, anterior pituitary cells, E587  
paracrine role for, pancreatic, E598  
release, antral gland cell column, G463  
secretion, pancreatic, autonomic control of (pig), E542
- Somatostatin-28, bimodal regulation, pancreatic exocrine function, G208
- Sorbital, glycogen and phosphorylase and, liver, E521
- Species differences  
 $\alpha$ -adrenergic receptors (dog, rat, rabbit), H957  
pharmacokinetic scaling, Dedrick plots, R768  
sodium depletion, dehydration effects (rat, rabbit, sheep), R287  
sugar and amino acid transport, intestine, G443
- Spectrometry  
mass  
gas chromatography, substrate turnover rate, E308  
oxygen partial pressure and blood flow, cerebral, H513
- Spectroscopy, nuclear magnetic resonance, nitrogen-14, mammalian tissue, C439
- Sphincter of Oddi, motilin effects (opossum), G476
- Spike activity, colonic, fiber effects, G301
- Spike bursts, motilin effects, sphincter of Oddi (opossum), G476
- Spinal afferents: *see* Afferents
- Spinal cord, electrophysiology, R751
- Splanchnic nerves, somatostatin secretion and, pancreatic (pig), E542
- Spleen  
circulation: *see* Circulation  
circulatory homeostasis and, sodium depletion, H573  
glucose metabolism, exercise and fasting, E443  
macrophages, electrogenic sodium-potassium pump (sheep), C184  
metabolism, pancreatic polypeptides, E171  
norepinephrine turnover, endotoxemia, H276  
venous return, nitroprusside effects, H814
- Splenic nerve, sympathetic responses, angiotensin and sodium chloride, R60
- Starch, intake, jejunoleum, G418
- Starling forces  
lymph modification, lymph node, H616  
peritubular, volume expansion effects, F272
- Starvation: *see* Fasting
- Statistics  
abuse of, linear models, R299  
information content, data, models, R620
- Steady-state  
contractions, tension and ATPase rates in, soleus fiber segments, C405  
multiple kinetic, sodium ion transport, skin (frog), R272
- Stenosis, coronary, rigid and compliant, distal coronary pressure effects, H1054
- Stereology, ear arteries, myograph ring segments and, morphometry, H840
- Steroidogenesis, angiotensin, calcium efflux and, E281
- Steroids, hormone changes, portacaval anastomosis, female, E288
- Stimulation, premature, sinoatrial node (guinea pig), H7
- Stimulus-secretion coupling: *see* Coupling
- Stomach  
bicarbonate transport, prostaglandin effects, G751  
function, endogenous opiate effects (monkey), G196  
gastric acid secretion, pentagastrin-stimulated, luminal somatostatin effects, G297  
gastric emptying of solids, antral control, G334  
hyperbaric conditions (dogfish), G236  
microvascular permeability in, histamine effects, G201  
monoclonal antibodies against hydrogen-potassium-ATPase, G589  
sodium concentration changes, anomalous potential difference responses (frog), G554  
surface mucus gel thickness, prostaglandin and damaging agent effects, G388  
sympathetic pathways to (guinea pig), G369  
thiocyanate increase in resistance of, mechanisms (frog), G143  
ulceration, prostaglandin protection against, G601
- Stop-flow studies, flow-dependent water permeability, Henle's loop, F743
- Streptozotocin, diabetes, cardiac sarcoplasmic reticulum function in, H969
- Stress  
behavioral  
angiotensin and renal excretion, awake state, R259  
renal excretory function, awake state, R251  
genetic variation and, noradrenergic system, R600  
psychological, adrenocorticotropin and corticosterone and, E515  
sympathetic response to, adult, neonatal hyperthyroidism and, R95
- Stroke volume: *see* Volume
- Submandibular gland  
ouabain-sensitive respiration, cholinergic stimulation of, G364  
transport inhibitor effects, G711
- Substance P, corelease with acetylcholine, esophageal muscularis mucosa (opossum), G19
- Substrates  
exogenous, utilization by myocytes, diabetes, C46  
glucose balance and, epinephrine effects, E294  
metabolic, brain uptake of, E253  
myocardial response to hypoxia, theophylline and, H363  
oxidation

- epinephrine sensitivity and, women, E431  
 spawning migration, liver (salmon), R827  
 turnover rate, isotope tracer studies, E308
- Succinate  
 ischemic myocardium, H406  
 transport, sodium-dependent, brush-border membrane vesicles, F374
- Succinic hydrogenase, muscle fiber response (barnacle), E230
- Suckling, milk intake, mechanism of control, R154
- Sucrase, dietary-induced decrease, jejunum, ileum, G418
- Sucrose  
 biliary permeability to, taurocholate effects, G651  
 distribution volume, lung, H229
- Sugar  
 potassium ion-stimulated uptake, skeletal muscle (frog), C125  
 transport  
 adaptive regulation of, intestine, G443  
 proximal tubule, F382  
 uptake, kidney brush border, newborn, F367
- Sulphydryl binding agents, passive sodium ion and potassium ion transport, erythrocytes, C348
- Sulfobromophthalein, hepatic uptake, G13
- Surfactant, lung, metabolism, granular pneumocytes, C397
- Sweat gland  
 adenosine monophosphate, cyclic level in, cholinergic potentiation of, C189  
 eccrine, structure and function, R203  
 Sweat rate, excess calcium and (monkey), R76
- Swimming: *see* Exercise
- Sympathectomy  
 circulatory and humoral response, hypoxemia, fetal (sheep), H767  
 guanethidine, ventromedial hypothalamic obesity and, R408
- Sympathetic activity, relations, diet-induced obesity, R364
- Sympathetic function, abnormal, obesity and, E87
- Sympathetic innervation, somatostatin secretion and, pancreatic, E542
- Sympathetic nerves  
 activity, hydrocortisone effects, H1013  
 adrenergic potentiation, prejunctional, H662  
 basal discharge, sequence of activation, R438  
 cardiac afferent, widespread neural excitation from, R241  
 cardiac efferent, widespread neural excitation from, R241  
 efferent: *see* Efferent nerve  
 elevated response, epicardium, healed myocardial infarction, H646  
 glucose production,  $\alpha$ -adrenergic stimulation, liver, E616
- Sympathetic nervous system  
 activity, blood pressure maintenance, dehydration and, awake state, H203  
 adrenal catecholamines, salt-sensitive genetic hypertension and, H762  
 adrenal medullary responses and, ischemic injury, E67
- diminished activity, genetic obesity, E148  
 fasting and refeeding, insulin effects, thermogenic responses, E160  
 hypertension, renal nerves and, F1  
 norepinephrine release, carotid occlusion and, H635  
 norepinephrine turnover, endotoxosis, H276  
 peripheral, genetic variation and stress effects, R600  
 stimulation  
 blood flow and oxygen consumption during, skeletal muscle, H66  
 cerebral blood flow regulation, hypoxic newborn (lamb), H487  
 vasodilation: *see* Vasodilation
- Sympathetic neurons  
 cardiac afferent, spinal reflexes, R345  
 thoracic, responses, urinary bladder afferents, R311  
 ventrolateral and dorsal medullary, sequence of activation, R438
- Sympathetic outflow, differential pattern of, upper airway stimulation with smoke, R433
- Sympathetic pathways, peripheral, gastroduodenal region (guinea pig), G369
- Sympathetic response  
 differential, angiotensin and sodium chloride, R60  
 epicardium, proximal to healed myocardial infarction, H646  
 stress, adult, neonatal hyperthyroidism effects, R95
- Synaptosomes, brain, single potassium ion channel current measurements, C151
- Systolic dynamics, left ventricular, H110
- T**
- Tachycardia, left ventricular response to, chronic volume overload effects, H218
- Taurine, restricted dietary intake, kidney adaptation, F159
- Taurochenodeoxycholate  
 paracellular permeability, colonic, G816  
 sodium chloride transport and, colon, G808
- Taurocholate  
 biliary permeability and, sucrose, G651  
 hepatic uptake, G13  
 uptake, amino acid inhibition of, hepatocytes, G399
- Taurodehydrocholate, biliary permeability and, sucrose, G651
- Teeth, incisor, calcium absorption and, intestinal, G438
- Temperature  
 blood flow distribution and, hindpaw, H159  
 circadian, light-dark masking of (monkey), R920  
 circadian clock, sleep and, R497  
 circadian rhythm and (monkey), R800  
 environmental, low pH, ammonia production and, kidney (goldfish), R590  
 intracellular pH interactions, hepatocytes, R32
- Temperature, body  
 brain, selective regulation (monkey), R293  
 brain and deep abdominal, during induced fever, pregnancy, R421
- colonic, fasting effects, E582  
 control, blood flow, tail, R426
- Tetraacetic acid, calcium release and, cardiac sarcoplasmic reticulum, C1
- Tetraethylammonium  
 secretion, proximal tubules, F238  
 sensitivity, diabetic heart, H808
- Tetrodotoxin  
 electronic interactions, sinoatrial node (guinea pig), H7  
 intestinal postprandial hyperemia, H437  
 mucosal transport and, ileal (guinea pig), G745  
 sodium ion channels and, myocardial cells, C381
- Thallium, fluxes, furosemide-sensitive, smooth muscle, uterus, F778
- Theophylline  
 adenosine action, oxygenated and hypoxic atria, H468  
 adenosine interactions, atria (guinea pig), H475  
 myocardial response to hypoxia, substrate dependence of, H363
- Thermodilution, low cardiac output and, H690
- Thermodynamics, network, theoretical and experimental biology, R1
- Thermogenesis  
 adenosine and, brown adipose tissue (hamster), E555  
 epinephrine sensitivity and, women, E431  
 insulin effects, fasting and refeeding, E160  
 lateral hypothalamic lesion-induced,  $\beta$ -adrenergic blockade effects, E535  
 muscular, migration and cold (bird), R755  
 nonshivering, energy expenditure defect, E107  
 nonshivering and shivering, glucose tolerance and insulin response, E575  
 norepinephrine-induced, suppression of by fasting, brown adipose tissue, E582  
 shivering, pectoralis muscle and (goldfinch), R265
- Thermoregulation  
 blood flow, tail, R426  
 circadian and arousal state influences (pigeon), R321  
 excess calcium and (monkey), R76
- Thermosensitivity, spinal, circadian and arousal state influences (pigeon), R321
- Thermotropic transition, brush-border and basolateral membranes, kidney cortex, F227
- Thiazolyethylamine, histamine receptor stimulation, myocardial blood flow and, H461
- Thiocyanate  
 gastric acid secretion and (guinea pig), G64  
 increase in resistance of gastric mucosa, mechanisms (frog), G143
- Thirst: *see* Drinking
- Thoracic aorta: *see* Aorta
- Thoracic duct, lymph flow, hypotonic, isotonic, and hypertonic fluid effects, R785
- Thrombin-antithrombin complex, anticoagulant activity, microvascular heparinlike species (calf), H725

- Thrombocytopathy, platelet storage pool deficiency, Chediak-Higashi syndrome (cattle), H150
- Thromboxane, plasma control, vitamin E deficiency, H867
- Thromboxane A<sub>2</sub> hyperreactivity, platelet-perfused heart, diabetes, H640
- platelet function regulation, R100
- Thymidine
- ADP-ribosyltransferase, renal brush-border membranes, C449
- DNA synthesis, pancreas, G99
- Thyrocalcitonin, urinary concentration and, F506
- Thyroidectomy, fasting and thermogenesis, brown adipose tissue, E582
- Thyroid gland, exercise, cardiac myosin isoenzymes and, H713
- Thyroid hormone
- activation, brain, E185
- anabolic effects, isolated heart, C328
- nuclear triiodothyronine receptors and, pituitary, E81
- Thyroid hormone analogues, nuclear triiodothyronine receptors and, pituitary, E81
- Thyroparathyroidectomy
- calcium transport and, kidney tubules, F515
- phosphate reabsorption, renal tubular capacity for, F345
- Thyrotropin, secretion, eutopic and heterotopic pituitaries, hypothyroidism effects, E32
- Thyrotropin-releasing hormone, pituitary, hypothyroidism effects, E32
- Thyroxine
- conversion to triiodothyronine, regulation of, perfused kidney, E220
- fasting effects, norepinephrine-induced thermogenesis, brown fat, E582
- neonatal hyperthyroidism, adult stress and, R95
- Tissue: *see also* specific type and site
- conceptus and maternal, glucose production (sheep), E347
- copper deficiency and, H855
- culture, phosphate uptake by kidney cell line, F22
- metabolism and blood flow, rest states, R110
- nuclear magnetic resonance spectroscopy, nitrogen-14, C439
- plasma fibronectin, endogenously labeled, R564
- Titrateable acid
- metabolic acidosis, proximal tubule, F680
- potassium relations, cortical tubule, F584
- Tolbutamide, metabolic effects, myocardial, H313
- Tracer
- kinetics, plasma fibronectin, incorporation into tissue, R564
- radioactive, non-steady state turnover, model, R624
- Tracheal epithelium
- ion transport, loop diuretic effects, C388
- potassium activity, intracellular, C248
- Tractus solitarius, phasic gastric distension, G242
- Training: *see* Exercise
- Transcapillary exchange
- glomerular permselectivity, F485
- postglomerular permselectivity, F496
- Transcendental meditation, blood flow and metabolism during, forearm, R110
- Transducer, single epicardial, myocardial thickening measurement (pig), H1066
- Transitivity, neuropsychobiological flows, R484
- Transmembrane potentials: *see* Potentials
- Transport inhibitors, secretion, submandibular gland, G711
- Transport: *see* specific subject and site
- Tricyclic antidepressant, regional blood flow, intraorgan, H707
- Triglycerides
- cardiac, fatty acid metabolism into, H693
- metabolism, liver perfusion and, G106
- obesity, hypophagia, E211
- turnover, experimental model, R386
- ureteral obstruction effects, kidney, F254
- Triiodothyronine
- conversion from thyroxine, regulation of, perfused kidney, E220
- plasma concentration, fasting effects, brown fat, E582
- tissue neogenesis, hypo- and hyperthyroidism, brain, E185
- L-Triiodothyronine, thyroid hormone and, isolated heart, C328
- Trimethylamines, nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439
- Tritiated quinuclidinyl benzilate, binding, fundic smooth muscle cells (guinea pig), G270
- Tropomyosin, cathepsin-D-catalyzed degradation and, H294
- Trypsin inhibitors, pancreatic secretion and, G394
- Tryptophan, ammonia effects, blood-brain barrier, C74
- Tubuloglomerular feedback: *see* Feedback
- Tunicamycin, neuronal insulin receptors and, C283
- Tyrosine 3-hydroxylase, high-salt diet and, genetic hypertension, H762

## U

- Ulcers, stress, luminal acidity and, R230
- Ultrasound, pulsed Doppler, myocardial thickening (pig), H1066
- Ultrastructure, myocytes, left ventricular, H830
- Uninephrectomy, baroreceptor alteration, salt intake and, awake state, F119
- Urate, transport, renal microvillus membrane vesicles, F151
- Urea
- hyperbaric conditions, gastric mucosa (dogfish), G236
- nitrogen-14 nuclear magnetic resonance spectroscopy, mammalian tissues, C439
- osmoregulation, brain (sheep), R853
- transport, nephron segments, F634
- Uremia, chronic, cellular basis for insulin resistance, E178
- Ureter
- ligation, proximal tubular cells, development, betamethasone effects, F232
- obstruction, unilateral, lipid metabolism and, renal, F254
- Urinary acidification
- chloride dependence, bicarbonate exit step, bladder (turtle), F564
- disequilibrium pH method of investigation, F535

- Urinary bladder
- acidification in
- chloride dependence of bicarbonate exit step (turtle), F564
- insulin stimulation of (turtle), R69
- afferents, upper thoracic sympathetic neuron responses, R311
- ammonia transport across (turtle), F210
- antidiuretic hormone-mediated osmosis, cytoplasmic involvement in (toad), C297
- carboxyl groups, sodium ion transport and (toad), F707
- colon and, calcium transport (toad), R91
- contractility constant, R673
- ion transport, control of (fish), R45
- proton secretion, carbon dioxide stimulated, membrane fusion (turtle), C113
- sodium ion transport, aldosterone action on sodium channel (toad), F726
- vasopressin-stimulated water flow, actin filaments, urinary bladder (toad), C28
- Urinary clearance, pancreatic polypeptides, liver and kidney, E171
- Urinary concentrating mechanism
- calcitonin effects, F506
- nephron segments, F634
- Urinary excretion, prostaglandin E<sub>2</sub>, water deprivation effects, R329
- Urinary output, arterial pressure relations, hypertension, R633
- Urine
- flow
- behavioral stress, angiotensin II effects, awake state, R259
- neural control of, awake state, R251
- oxygen partial pressure, urinary acidification after hypocapnia, F433
- Ursodeoxycholic acid, biotransformation, hepatic, G411
- Uterus
- blood flow: *see* Blood flow
- calcium ion flux, catecholamine stimulation of, C84
- lipoprotein lipase activity, hormone-treated and pregnant rats, E132
- smooth muscle, furosemide-sensitive thallium fluxes, F778
- temperature, induced fever, pregnancy, R421

## V

- Vacuoles, autophagic, colloidal silica, liver, C52
- Vagal blockade: *see* Blockade
- Vagus nerve
- airway receptors and (opossum), R209
- blockade: *see* Blockade
- somatostatin secretion and, pancreatic (pig), E542
- stimulation
- benzimidazole inhibition, gastric, G739
- catecholamine effects, heart, H721
- secondary atrioventricular conduction during, H584
- sympathetic, hyperinsulinemia, autonomic drug and glucose effects, R372
- Vagus node, sinoatrial node interactions, model, H1039
- Valine, transport, atypical amino acid effects, brain, R556
- L-Valine, transport, kidney brush border, newborn, F367

# SUBJECT INDEX TO VOLUME 245

- Vanadate, vasopressin inhibition, cortical collecting tubule, F772
- Vasa recta, autoregulation, kidney, F32
- Vascular changes, ischemia-induced, xanthine oxidase and hydroxyl radicals, G285
- Vascular mixing, countercurrent capillary exchange, model, R534
- Vascular resistance: *see* Resistance
- Vascular tissue, endogenous norepinephrine uptake inhibitor, plasma, H336
- Vascular tone, intrinsic, vascular calcium channels, H1024
- Vascular waterfall, arterial pressure determinants, H453
- Vasoconstriction
- coronary, H937
  - microsphere estimation, gut mucosa, G29
  - pial arterioles, hydroxyl radical effects, H139
  - sympathetic, blood flow and oxygen consumption, skeletal muscle, H66
- Vasoconstrictors
- coronary artery response to, H937
  - prostaglandin synthesis and, vascular smooth muscle, C278
- Vasodilation
- calcium ion and myosin phosphorylation, arterial smooth muscle, C255
  - cerebral arterioles, magnesium ion concentration and, H22
  - histamine effects, stomach, G201
  - kidney, maximum, Goldblatt hypertension, H790
  - pial arterioles, hydroxyl radical effects, H139
  - renal, hyperoncotic dextran, F687
  - sympathetic, blood flow and oxygen consumption, skeletal muscle, H66
- Vasodilator, microsphere estimation, gut mucosa, G29
- Vasomotor tone, arterial pressure determinants, H453
- Vasopressin
- adrenocorticotropin and blood pressure and, during hypoxia, E489
  - angiotensin and, regional blood flow following hemorrhage, H749
  - arginine
    - antagonist action, R713
    - fetal responses to (lamb), E24
    - liver regeneration and, G321
    - urea transport and, nephron segments, F634  - vasoconstrictor-evoked prostaglandin synthesis, vascular smooth muscle, C278
  - blood and third ventricle cerebrospinal fluid, dehydration, thirst, and hemorrhage, R541
  - blood pressure maintenance and, dehydration, F615
  - blood pressure maintenance, dehydration and, awake state, H203
  - carboxyl groups, sodium transport and, urinary bladder (toad), F707
  - epithelial cell growth, renal (monkey), C365
  - hemorrhage, cardiac denervation, awake state, H399
  - hypoxemia effects, sympathectomy, fetal (sheep), H767
  - inhibition of action, vanadate, cortical collecting tubule, F772
  - intramembrane particle aggregates and, epidermis (toad), C334
  - pH dependence, collecting tubules, F188
  - plasma
    - chronic clearance, E611
    - left ventricular receptor stimulation effects, awake state, R792  - pressor effects, R906
  - prostaglandin E<sub>2</sub> and, adenosine monophosphate, cyclic, in single nephron, F58
  - prostaglandin E responsive to, fluid intake effects, F48
  - secretion, daily sodium intake effects, R850
  - water flow, actin filaments and, urinary bladder (toad), C28
- Velocity
- conduction, cardiac impulse, H901
  - maximum contractile element, urinary bladder, R673
  - wave, arterial system (diamond python), R831
  - zero contour, relaxation, cardiac muscle (ferret), H610
- Velocity spectrum, afferent fiber, acupuncture and, R606
- Vena cava, occlusion, magnitude of unipolar atrial electrograms and, H580
- Venoconstriction, intracranial pressure, high, H947
- Venom, scorpion, mucosal transport, ileal (guinea pig), G745
- Venous return, sensitivity, nitroprusside effects, H814
- Ventilation, intermittent positive-pressure, cardiovascular changes from, H307
- Ventilatory control, metabolic alkalosis, R873
- Ventral medulla, pressor response mediation, cerebral ischemia, H962
- Ventricles: *see* Cerebral ventricles; Heart ventricles
- Ventriculoarterial coupling: *see* Coupling
- Verapamil
- calcium channels resistant to, vein, H1024
  - carotid baroreceptors and baroreflexes, H653
  - magnesium ion concentrations and, cerebral arterioles, H22
  - renal failure, ischemic acute, model, F735
  - renin and aldosterone and, E410
  - slow action potentials, dystrophic skeletal muscle, C415
- Veratrine, plasma vasopressin and, awake state, R792
- Vessels, small, hematocrit in, micromorphometry, H167
- Video measurement, basolateral membrane hydraulic conductivity, proximal tubule, F123
- Villus, blood flow estimation, gut mucosa, G29
- Visual acuity, retinal and cortical field potentials, pattern stimulation, R637
- Vitamin D
- calcium efflux and, pregnancy and lactation, intestines, G624
  - 25-hydroxy-, phenobarbital effects, liver, E55
  - metabolism
    - metabolic alkalosis, chronic hyperparathyroidism, F450
    - phenobarbital effects, liver, E55
- Vitamin D<sub>3</sub>
- absorption and transport, intestinal lymph, E463
  - 25-hydroxy-, absorption and transport, intestinal lymph, E463
  - metabolites, stimulation of 24R,25-dihydroxyvitamin D<sub>3</sub> synthesis, E359
  - plasma clearance, intestinal lymph, E326
  - 24R,25-dihydroxy-, synthesis, stimulation by metabolites of vitamin D<sub>3</sub>, E359
- Vitamin E, deficiency, plasma prostaglandin control in, H867
- Voltage
- transepithelial
    - changes, prostatic secretion, F470
    - vanadate and vasopressin action, cortical collecting tubules, F772
- Voltage dependence, caffeine-induced current, heart cells, embryo (chick), H528
- Volume
- brain, control during osmotic disturbances (skate), R853
  - contraction, metabolic alkalosis, F425
  - fluid
    - extracellular, chloride-depletion alkalosis, F419
    - hypoproteineimia effects, H284
    - heart, caval occlusion effects, H580
    - lung, albumin distribution and, H229  - plasma
    - central nervous system regulation, R901
    - control, pregnancy, R720
    - two-kidney renal hypertension, H683  - stroke
    - allometric relations (bird), H567
    - end-systolic relations, left ventricle, H773
- Volume control, milk intake, suckling, R154
- Volume expansion
- metabolic alkalosis, F425
  - plasma chloride and, effects on loop segment, F41
  - proximal reabsorption and, sodium chloride vs. sodium bicarbonate, F272
- Volume overload, tachycardia, left ventricular response to, H218
- Volume regulation, B lymphocytes, anion conductance in, C160

## W

- Water
- absorption, intestinal, pH, carbon dioxide pressure, and bicarbonate effects, G230
  - balance, daily sodium intake effects, R860
  - brain, osmoregulation (skate), R853
  - channels, antidiuretic hormone-mediated osmosis, urinary bladder (toad), C297
  - deprivation
    - sodium balance and, species differences (rat, rabbit, sheep), R287
    - urinary excretion of prostaglandin E<sub>2</sub>, R329
    - urinary prostaglandin E and, F48  - excretion
    - antagonist-to-antidiuretic action of arginine vasopressin, R713
    - renal, pH and amiloride effects, F198  - flow: *see* Flow
  - flux, esophagus, sodium transport (flounder), R888
  - permeability: *see* Permeability

Water (*continued*)  
transcellular, shifts, thoracic duct lymph  
flow, R785  
transcellular transport, proximal tubule,  
F279  
transport, developmental pattern, super-  
ficial nephrons, F15  
vasopressin-stimulated flow, actin fila-  
ments and, urinary bladder (toad),  
C28  
Waveforms, biphasic, defibrillator safety  
factor, H60

Weight  
body  
developing hypertension and, H1081  
gain, endocrine basis for, fasting or  
ventromedial hypothalamic lesion,  
E246  
loss, spontaneous obesity and (dorm-  
ice), R396, R403  
regulation, intestinal bypass surgery,  
R658  
lymph flow relations, lung, H125

Wheel-running: *see* Exercise  
White blood cells: *see* Leukocytes

X

Xanthine oxidase, ischemia-induced vascu-  
lar changes, G285

Y

Yolk sac,  $\alpha_2$ -macroglobulin distribution,  
E138
